Each contract is awarded by the CEO following a comprehensive evaluation process and review by the Chief Engineer. The evaluation process consists of assessment by an experienced panel with oversight from a probity advisor. The evaluation team conducts a detailed review of pricing, non-price criteria, and any contract departures, resulting in a weighted scoring that ranks the tenders for value for money. An evaluation report is prepared, reviewed and endorsed by the Chief Engineer for approval by the CEO. This process ensures robust assessment and governance for all packages of work.

Each successful supplier has been through this process, with the delivery team confident that the successful tenderers offer the best overall value—balancing risk mitigation, scheduling efficiency, and minimizing community impacts.
