

8.1. PETITION SEEKING COUNCIL TO INSTALL WATER REFILLING STATIONS IN PORT DOUGLAS

REPORT AUTHOR	Brenda Jang, Executive Assistant
MANAGER	Mark Stoermer, Chief Executive Officer
DEPARTMENT	Office of the Chief Executive

RECOMMENDATION

That the Petition be received and referred to the Chief Executive Officer for consideration and investigation.

EXECUTIVE SUMMARY

A Petition was received by the Council Administration Office and in accordance with clause 5.1 of the Standing Orders for Council Meetings, this petition is presented to Council.

The Petition is asking Council to consider installing water refilling stations in Port Douglas to help reduce the amount of single use plastic water bottles, which in turn protects the waterways, Great Barrier Reef and the marine creatures, as well as reducing the amount of plastic sent to landfill.

The principal petitioner is Maggie Kelly who has obtained 538 signatures. Due to the Privacy Act, personal details of the principal Petitioner and petitioners have been suppressed. The Petition has also received support from the following groups:

Plastic Free Douglas
Great Barrier Reef Marine Park Authority
Tourism Port Douglas and Daintree
Douglas Local Marine Advisory Committee
Douglas Shire Sustainability Group
Tangaroa Blue
Reef Clean

PROPOSAL

In accordance with Council's Standing Orders for Council Meetings, it is proposed that Council receive the petition and refer it to the Chief Executive Officer for consideration and investigation.

DOUGLAS SHIRE COUNCIL	
Folder	Gov/cm/petitions
Doc ID	904823
Received	20 JUN 2019
Attention	BJJ NSB.
Information	

Dear Mayor Leu,

Please find attached a petition to the Council that I have instigated on behalf of the residents, businesses and visitors to Port Douglas and our beautiful Shire of Douglas.

The petition is asking that you seriously consider water refilling stations be installed in Port Douglas. By refilling personal bottles, we will help reduce the amount of single use plastic water bottles, which in turn protects our waterways, the Great Barrier Reef and our marine creatures, as well as reducing the amount of plastic sent to landfill.

I saw these water refilling stations in Hardys Bay, N.S.W. (see attached photos) and was very impressed with the message they convey.

By using large signage, these refilling stations help educate our children to refill not litter, encourage people to drink more water and are a reminder that by refilling their bottles, people are directly helping protect the Reef.

I and the community strongly believe that we need to reduce the sale of plastic water bottles. A number of these bottles end up in our oceans and it is estimated that more than a quarter of all fish in the oceans now contain plastic, a figure that is quite unacceptable.

The following groups are supporting this petition:-

Plastic Free Douglas
Great Barrier Reef Marine Park Authority
Tourism Port Douglas & Daintree
Douglas Local Marine Advisory Committee
Douglas Shire Sustainability Group
Tangaroa Blue
Reef Clean

We are also supported by the businesses in Macrossan Street, as well as the tourist boats and dive companies, including Quicksilver and Calypso.

I sincerely hope that you can find the time to consider this petition and please feel free to call me if you have any further questions.

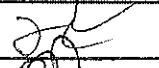

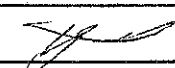

Kind Regards

Maggie Kelly
Maggie Kelly

Petition for Water fountains to be installed to help reduce plastic bottles.

RE: Installation of water bottle refill stations in Port Douglas

Dear Mr Stoermer,

The Douglas Local Marine Advisory Committee (LMAC) is writing to you regarding the installation of water refill stations in Port Douglas.

Concerns regarding the sale and promotion of single use plastic bottles in Port Douglas have recently been brought to the Committee's attention. Stands of single use water bottles, and in some instances, pallettes of water bottles, are now a common sight in Port Douglas.

Our livelihoods are reliant on the health of the Great Barrier Reef and Wet Tropics rainforest, with people travelling from around the world to experience one or both of these amazing places.

The environmental impacts of single-use water bottles are well documented. Taking up to 450 years to biodegrade, they consume energy in their production, transportation and recycling, are one of the major sources of litter and plastic accumulation in our waterways and oceans, and contributors to landfill (see link [here](#)).

As a community entrusted with looking after two of the world's most precious natural assets, we believe practices promoting the use of single use water bottles negatively impact on our region's image and detract from our brand as a nature-based destination.

The '[Future 100: 2019](#)' report, just released by one of the world's best-known marketing and communications agencies, JWT Intelligence, describes the big disruptive economic and environmental drivers affecting consumer behaviours and emerging trends. It states:

'It's clear that brand sustainability, once viewed as "nice to have" is now a mandate and a base expectation of consumers.'

"Marine debris is a major threat to the health of the Great Barrier Reef and kills marine life such as turtles, dugongs, dolphins and seabirds. Collective action by community, industry and government to choose sustainable options, minimise waste and undertake stewardship activities is required to reduce the impacts of marine debris on the Reef."

[Great Barrier Reef Marine Park Authority Marine Debris Position Statement](#), December 2018

Filtered water refill stations serve as a great alternative to the use of single use plastic water bottles and deliver a range of benefits.

We believe the installation of water refill stations at key locations in Port Douglas could form part of a larger coordinated effort to reduce single use plastics and get the message across to everyone that we not only rely on our natural assets but, as a community, we care for them.

We think there is a real opportunity to use the installation of water refill stations to promote the region's pristine image and our communities' 'green' credentials. We could promote that our water is sustainably sourced from our pristine rainforest (why drink water imported from overseas?).

Refill stations give visitors and locals alike a way to make positive and responsible choices. By using water refill stations, people are reducing energy consumption, the generation of plastic waste, and protecting our World Heritage listed waterways and Great Barrier Reef.

There are lots of great examples of others doing this including the Central Coast Council (see photos) and the University of Queensland (see link [here](#)).

We contacted the Central Coast Council and their officers kindly advised that they purchase their water refill stations from a company called [Civiq](#).

We strongly encourage and would be happy to work with Council on a program to install water refill stations in Port Douglas. This could include looking for potential grants to support the purchase, installation (identification of optimum locations is critical) and promotion of water refill stations.

If you have questions regarding this letter, please do not hesitate to contact me on 0438-591929.

Thank you for considering this matter.

Yours sincerely,

Josh Gibson
Chair, Douglas Local Marine Advisory Committee

Enclosure: Photos of water refill stations from NSW Central Coast

Local Marine Advisory Committees

Established by the Great Barrier Reef Marine Park Authority, the LMAC is a forum to encourage and empower local communities to take actions to reduce threats to the Great Barrier Reef. This includes fostering partnerships for stewardship action in the Reef's catchment to improve water quality and reduce the risk of marine debris, in particular plastics, impacting coastal and marine ecosystems. Our membership reflects a diverse range of community interests including agriculture, tourism, natural resource management, research, education and conservation.
