COMMENTS

Dear Neil Beck,

Please find attached three (3) copies of a development application seeking a development permit for Material Change of Use - Undefined Use (Wedding Ceremony and Reception Venue) on land described as Lot 115 on SP199697 located along Trezise Road, Mowbray.

Please note that a cheque to the amount of \$4,500.00 has also been provided for the agreed application fee in order to assess the proposed development application.

Should you have any queries regarding this matter please do not hesitate to contact this office.

Kind regards,

Charlton Best

Chief Executive Officer
Douglas Shire Council
PO Box 723
MOSSMAN QLD 4873

Attention: Mr. Neil Beck

Dear Neil

JOHN & JOANNE WOOTTEN
APPLICATION SEEKING A DEVELOPMENT PERMIT FOR A
MATERIAL CHANGE OF USE – UNDEFINED USE (WEDDING CEREMONY & RECEPTION VENUE)
ON LAND DESCRIBED AS LOT 115 ON SP199697 LOCATED AT TREZISE ROAD, MOWBRAY

We act on behalf of the applicant, John and Joanne Wootten, in relation to the abovementioned development and provide herewith an application seeking a Development Permit for a Material Change of Use – Undefined Use (Wedding Ceremony and Reception Venue) on land located along Trezise Road, Mowbray being properly described as Lot 115 on SP199697.

To assist in Councils assessment of the application, please find enclosed the following documents:

- Attachment A: IDAS Forms 1 & 5;
- Attachment B: Certificate of Title;
- Attachment C: Smart Map;
- Attachment D: Locality Plan;
- Attachment E: Planning Area Map; and
- Attachment F: Proposal Plans.

THE SITE**Property Description**

Property Address: Trezise Road, Mowbray
Property Description: Lot 115 on SP199697
Parish of Mowbray, County of Solander
Total Subject Area: 2.056 hectares
Planning Area: Rural

The Certificate of Title, included at *Attachment B* confirms that John Peter Wootten and Joanne Clare Wootten are the registered owners of the subject land parcel. The Certificate of Title also confirms that there are no easements affecting the land.

Site Characteristics

The subject land parcel is irregular in shape and encompasses a total site area of approximately 2.056 hectares. The subject site is located within the Rural Planning Area under the Douglas Shire Planning Scheme and has frontage to Trezise Road on its eastern boundary where vehicular access is provided. A current Smart Map is included at *Attachment C*, which identifies the existing allotment configuration.

The property is currently improved with a single dwelling house being located towards the northern portion of the site. The majority of the site is generally flat and is orientated in a north-south direction. The Locality Plan at *Attachment D* incorporates an aerial photo of the land parcel and shows a brief outline of the surrounding properties.

The subject land parcel is bounded by Spring Creek along the western perimeter, while adjoining one rural freehold property to the south. Infrastructure such as electricity and telecommunications are located within close proximity to the site and access to these services is already provided.

Surrounding Area

The land subject to this application is located within the Mowbray Valley locality. The uses in the locality which surround the subject site are generally medium to large rural sized allotments with the majority being utilised for single dwelling houses and sugarcane farming.

The subject site is located approximately 8.5 kilometres south of the Port Douglas township centre and approximately 1.5 kilometres south-west of the Captain Cook Highway at its closest point. The surrounding environment of the locality is presented with natural landscape features, while being connected to a formalised local road network.

Dominant land uses adjacent to, and/or within proximity to the premises are represented by the surrounding planning areas which include:-

- North: Rural
- East: Rural
- South: Rural
- West: Rural

As demonstrated above, the locality is generally comprised of land uses consistent with the Rural designation. Therefore, it is considered that the proposal, as detailed in this report, will assimilate and positively contribute towards the local character of the area.

Appendix E contains a Planning Area Map identifying the site in relation to the surrounding area.

PROPOSAL

Approval of the Development Application will authorise a Development Permit for the Material Change of Use – Undefined Use (Wedding Ceremony and Reception Venue) on land described as Lot 115 on SP199697 located along Trezise Road, Mowbray.

The proposed Undefined Use (Wedding Ceremony and Reception Venue) will provide an outdoor facility upon the premises, which can be hired by public members to host specific wedding ceremonies and associated formal receptions. It is expected to assist in bolstering the successful wedding market in the Port Douglas region, while promoting direct expenditure through local dining, accommodation and tourist businesses.

An existing single highset dwelling house has recently been constructed upon the site and has been complemented with manicured landscape gardens. This building contains toilet facilities that are connected to an on-site wastewater disposal and treatment system that will be utilised to assist with catering for the expected wedding functions upon the site. Additional portable toilets can be separately organised depending on guest numbers.

Proposal plans are provided at *Attachment F*, which identifies the proposed Wedding Ceremony and Reception Venue along with the existing building upon the site.

It is expected that the proposed facility will generally be utilised during a weekend, although will be made available for hire throughout the week if required. It is also noted that all food and beverages will be catered for by the wedding event organisers, along with any associated entertainment (i.e. music, bands etc).

The subject venue incorporates well established vegetation surrounding the perimeter of the site that will complement an attractive natural open-air setting for formal wedding events. This perimeter vegetation also assists in providing an acoustic and visual buffer to surrounding properties.

Vehicular access and egress to the venue will be made available from Trezise Road, via an existing driveway crossover. Rather than providing for hardstand areas upon the site, informal car parking and manoeuvring can be sufficiently accommodated within close proximity of the existing building, to ensure the site grounds are kept in its current state and to minimise any visual change upon the streetscape and surrounding area.

The proposed low-impact development use over the site will not detrimentally impact the strategic intent of the area to which it is located. The proposed use seeks to offer an alternative Wedding Ceremony and Reception Venue option that will further benefit the locality, while being complemented by the surrounding natural landscape features throughout the immediate area.

THE PLANNING FRAMEWORK

Assessment Criteria of Impact Assessable – Material Change of Use Application

Under the Douglas Shire Planning Scheme the site is included in the **Rural Planning Area**. Based on the type of development proposed to be carried out, the Assessment Table for 'Rural Areas and Rural Settlements Locality – Table 1' identifies that the level of assessment required for the proposed Undefined Use is **Impact Assessment**. All aspects of the proposed development are generally considered to be compliant with the relevant performance criteria and acceptable solutions of the Rural Areas and Rural Settlements Locality Code, Rural Planning Area Code, Design & Siting of Advertising Devices Code, Filling & Excavation Code, Landscaping Code, Natural Areas and Scenic Amenity Code, Vehicle Parking & Access along with the Natural Hazards Code being applicable to the proposed development.

An assessment against the applicable codes is provided below:

Rural Areas and Rural Settlements Locality Code

The subject land is located within the Rural Areas and Rural Settlements Locality where the predominant form of surrounding development is primary industry upon medium to large rural sized allotments, along with low density residential development.

It is considered that the proposed material change of use for a Wedding Ceremony and Reception Venue is generally consistent with the overall outcomes and performance criteria sought by the code, as justified below;

- The proposed development will ensure that existing primary industry production throughout the locality is maintained, while having no impact upon the rural landscape character or scenic visual amenity of the area;
- No additional built form structures are required to be constructed as part of this proposal, with the subject site already being serviced by the required level of infrastructure. Furthermore, the existing vehicular access point into the site will be maintained in order to complement the intended use;
- Indigenous interests throughout the area will not be impacted given that the subject site is not associated with any Indigenous Land Use Agreements (ILUA); and
- The proposal will not pose an environmental or conservation threat upon the nearby waterway of Spring Creek nor will it impact upon the future activities or the strategic intent of the immediate locality.

Rural Planning Area Code

The subject land is wholly contained within the Rural Planning Area. It is expected that land within this planning area is intended to comprise a wide range of agricultural and animal husbandry uses, together with other compatible primary production uses.

Given that the land has previously been cleared of any primary production uses and subsequently the site has been transformed into a low density rural lifestyle block, any potential future uses involving agriculture has been removed. The proposal seeks to utilise the current built environment and landscape throughout the site in order to facilitate the low impact transient operations involving formal wedding ceremonies and associated receptions.

The subject proposal is not considered to be an inconsistent use for the site, which will be buffered from surrounding rural properties by existing well established vegetation prominent along the northern, eastern and western site perimeter boundaries.

The proposed development will not impact upon any environmental aspects throughout the immediate area, rather will seek to utilise the existing natural landscape beauty of the site and surrounds in order to support and complement the expected use.

Overall it is considered that the proposed development achieves consistency with the applicable acceptable solutions and performance criteria of the Rural Planning Area Code and therefore will not impact the strategic intent of the area.

Design & Siting of Advertising Devices Code

The purpose of the Design & Siting of Advertising Devices Code is to ensure that Advertising Devices do not adversely impact the streetscape or surrounding amenity of the locality through scale and quantity restrictions of such advertising devices.

The proposal does not seek to establish any visible advertising signage upon the site or within any nearby road reserve area. Promotional advertising for the intended wedding venue hire is expected to be undertaken through avenues such as social media and affiliated wedding organisers.

Overall it is considered that the proposed development achieves consistency with the applicable acceptable solutions and performance criteria of the Design & Siting of Advertising Devices Code.

Filling and Excavation Code

The purpose of this Code is to ensure that filling and excavation does not adversely affect the environmental and scenic amenity of the locality or cause downstream flooding and drainage problems.

The proposal does not require any site works to be undertaken, rather seeks to utilise the existing built form and natural landscape beauty of the site and surrounds in order to support and complement the expected use as a Wedding Ceremony and Reception Venue.

Overall it is considered that the proposed development achieves consistency with the applicable acceptable solutions and performance criteria of the Filling and Excavation Code.

Landscaping Code

The purpose of the Landscaping Code is to ensure that the tropical and native landscape character of the shire is maintained and strengthened, while complementing the built form environment through landscape design.

As indicated earlier, an existing single highset dwelling house has recently been constructed upon the site and has been complemented with manicured landscape gardens. The subject venue also incorporates well established vegetation surrounding the perimeter of the site that will be maintained in order to provide an attractive natural open-air setting for formal wedding events. This perimeter vegetation also assists in providing an acoustic and visual buffer to surrounding properties.

Overall it is considered that the proposed development achieves consistency with the applicable acceptable solutions and performance criteria of the Landscaping Code.

Natural Areas and Scenic Amenity Code

The purpose of this code seeks to ensure that areas of natural significance and scenic amenity value is retained and conserved in order to protect unique environmental values including biodiversity throughout the shire.

The proposal does not require any filling or excavation works to be undertaken that will cause a detrimental impact upon any aquatic environment. Additionally, the proposed development will not impact upon any vegetated environmental aspects throughout the immediate area, rather will seek to utilise the existing natural landscape beauty of the site and surrounds in order to support and complement the expected use.

Vehicle Parking and Access Code

The Vehicle Parking and Access Code seeks to ensure that sufficient car parking is provided for users on-site, while manoeuvring areas are designed to allow for safe and efficient transport movements. The code also seeks to ensure that access arrangements do not impact the efficiency of the transport network.

While schedule 1 of this code does not specify a prescribed number of on-site vehicle parking spaces for a Wedding Ceremony and Reception Venue, the proposal seeks to utilise an informal car parking and manoeuvring arrangement upon the site. Given the large site area and ease of access, sufficient room is available to satisfy this requirement.

It is expected that in some instances alternative transport arrangements will be made through local bus charter businesses, which will shuttle wedding guests from various accommodation venues throughout Port Douglas to the site. This will limit the impact of providing on-site car parking for users to the site.

No hardstand areas are intended to be constructed for the proposed low impact transient use as a Wedding Ceremony and Reception Venue, which will ensure that the site grounds are kept in its current state and any visual change upon the streetscape and surrounding area is minimised.

As identified earlier, the existing vehicular access point into the site will be maintained from Trezise Road in order to complement the intended use, therefore ensuring that the effective function of the existing street and traffic network is maintained.

Natural Hazards Code

The Douglas Shire Planning Scheme Overlay Mapping identifies that the majority of the site is located in the Medium Risk Bushfire Hazard Area. Accordingly, assessment against the Natural Hazards Code is applicable. The Natural Hazards Code seeks to ensure that development minimises the potential adverse impacts of bushfire on people, property and the environment.

The subject site has previously been cleared of any hazardous vegetation, however incorporates well established vegetation only to the northern, eastern and western perimeter boundaries. As indicated earlier, a single highset dwelling house has recently been constructed upon the site and has been complemented with manicured landscape gardens. This structure is positioned a significant distance from the larger perimeter vegetation and is in no threat of being impacted by a bushfire event.

Additionally, the site is connected to a reliable source of reticulated bore water and also to rainwater tanks. The subject site incorporates unrestricted road access for firefighting or other emergency vehicles.

Overall it is considered that the proposed development achieves consistency with the applicable acceptable solutions and performance criteria of the Natural Hazards Code.

LEGISLATIVE FRAMEWORK – SUSTAINABLE PLANNING ACT 2009

The *Sustainable Planning Act 2009* (SPA) forms the foundation of Queensland's planning and development assessment legislation. The purpose of SPA is to balance community well-being, economic development and the protection of the natural environment by providing a framework for managing growth and change within the State.

SPA imposes requirements on state and local government through the Integrated Development Assessment System (IDAS). IDAS aims to co-ordinate and integrate the assessment and conditioning powers of government agencies responsible for administering a range of legislation dealing with development approvals.

Assessment Manager

In accordance with Schedule 6, Table 1, Item 1 of the *Sustainable Planning Regulation 2009* the Douglas Shire Council is the assessment manager for the development application.

Douglas Shire Council's jurisdiction is limited to that stated in section 314 of the *Sustainable Planning Act 2009*.

Referral Agencies

The Integrated Development Assessment Process incorporates a referral process, established through the *Sustainable Planning Regulation 2009* enabling relevant state agencies to have input in the assessment process.

Schedule 7 of the *Sustainable Planning Regulation 2009* outlines the triggers for the referral of the development application to other agencies.

A review of the proposal against Schedule 7 of the *Sustainable Planning Regulation 2009* confirms that this application does not trigger referral to the chief executive administering the *Sustainable Planning Act 2009* (SPA), being the Director-General of the Department of State Development, Infrastructure and Planning (DSDIP).

CONCLUSION

This report forms part of the development application, which seeks a Development Permit for an Undefined Use (Wedding Ceremony and Reception Venue) over Lot 115 on SP199697 located along Trezise Road, Mowbray.

Site treatments are able to be managed by conditions. The proposal is considered an appropriate development given the site's inclusion within the Rural Zone and based on the surrounding natural beauty of the Mowbray Valley. Furthermore, the development is generally in accordance with the provisions prescribed by the Douglas Shire Council Planning Scheme. The following conclusions can be drawn from the above referenced planning aspects of the proposal:

- The proposed development is compatible within the Rural Zone, with the subject allotment incorporating an appropriate area and dimensions to accommodate the intended low impact development prospect;
- The proposed development is in keeping with the scenic qualities of the surrounding locality and will not diminish the existing character of the area to which it is located nor will it impact upon the strategic intent for the area;
- The proposed development is responsive to all environmental constraints and is expected to have minimal impact on the landscape character and visual amenity;
- The proposed material change of use addresses the relevant elements of the Douglas Shire Planning Scheme and in particular the Rural Areas and Rural Settlements Locality Code, Rural Planning Area Code, Design & Siting of Advertising Devices Code, Filling & Excavation Code, Landscaping Code, Natural Areas and Scenic Amenity Code, Vehicle Parking & Access and Natural Hazards Code including each of the performance criteria and acceptable solutions;
- The proposed development does not intend to modify existing land contours, therefore ensuring that overland flow paths do not directly or indirectly cause nuisance to a downstream or adjoining property;
- The proposed development is capable of being adequately serviced by the required level of infrastructure;
- The proposal will not have a detrimental impact on the function of the existing street and traffic network, with the existing vehicular access point into the site being maintained; and
- The proposed use is of a scale and nature that contributes to the proper and orderly development of the locality while respecting the character of the locality.

On balance, it is considered that the proposed development is an appropriate response to the site and, subject to the imposition of reasonable and relevant conditions, Council will be able to issue a permit for a Material Change of Use to accommodate Wedding Ceremonies and Receptions upon this uniquely located site.

We trust that the enclosed documentation is sufficient to allow Council's assessment of the proposed development, however, should you have any further queries or wish to discuss please do not hesitate to contact this office.

Yours sincerely,
Brazier Motti Pty Ltd

CHARLTON BEST
Senior Town Planner

cc: John and Joanne Wootten

IDAS form 1—Application details

(Sustainable Planning Act 2009 version 4.1 effective 4 July 2014)

This form must be used for **ALL** development applications.

You **MUST** complete **ALL** questions that are stated to be a mandatory requirement unless otherwise identified on this form.

For all development applications, you must:

- complete this form (*IDAS form 1—Application details*)
- complete any other forms relevant to your application
- provide any mandatory supporting information identified on the forms as being required to accompany your application.

Attach extra pages if there is insufficient space on this form.

All terms used on this form have the meaning given in the *Sustainable Planning Act 2009* (SPA) or the Sustainable Planning Regulation 2009.

This form and any other IDAS form relevant to your application must be used for development applications relating to strategic port land and Brisbane core port land under the *Transport Infrastructure Act 1994* and airport land under the *Airport Assets (Restructuring and Disposal) Act 2008*. Whenever a planning scheme is mentioned, take it to mean land use plan for the strategic port land, Brisbane core port land or airport land.

PLEASE NOTE: This form is not required to accompany requests for compliance assessment.

This form can also be completed online using MyDAS at www.dsdip.qld.gov.au/MyDAS

Mandatory requirements

Applicant details (Note: the applicant is the person responsible for making the application and need not be the owner of the land. The applicant is responsible for ensuring the information provided on all IDAS application forms is correct. Any development permit or preliminary approval that may be issued as a consequence of this application will be issued to the applicant.)

3. Total area of the premises on which the development is proposed (indicate square metres)

20,560 square metres

4. Current use/s of the premises (e.g. vacant land, house, apartment building, cane farm etc.)

Single Dwelling

5. Are there any current approvals (e.g. a preliminary approval) associated with this application? (Non-mandatory requirement)

☒ No ☐ Yes—provide details below

List of approval reference/s	Date approved (dd/mm/yy)	Date approval lapses (dd/mm/yy)

6. Is owner's consent required for this application? (Refer to notes at the end of this form for more information.)

☐ No
☒ Yes—complete either Table F, Table G or Table H as applicable

Table F

Name of owner/s of the land	John Peter Wootten and Joanne Clare Wootten
I/We, the above-mentioned owner/s of the land, consent to the making of this application.	
Signature of owner/s of the land	
Date	20/02/2015

Table G

Name of owner/s of the land	
<input type="checkbox"/> The owner's written consent is attached or will be provided separately to the assessment manager.	

Table H

Name of owner/s of the land	
<input type="checkbox"/> By making this application, I, the applicant, declare that the owner has given written consent to the making of the application.	

7. Identify if any of the following apply to the premises (Tick applicable box/es.)

- ☐ Adjacent to a water body, watercourse or aquifer (e.g. creek, river, lake, canal)—complete Table I
- ☐ On strategic port land under the *Transport Infrastructure Act 1994*—complete Table J
- ☐ In a tidal water area—complete Table K
- ☐ On Brisbane core port land under the *Transport Infrastructure Act 1994* (No table requires completion.)
- ☐ On airport land under the *Airport Assets (Restructuring and Disposal) Act 2008* (no table requires completion)
- ☐ Listed on either the Contaminated Land Register (CLR) or the Environmental Management Register (EMR) under the *Environmental Protection Act 1994* (no table requires completion)

Table I

Name of water body, watercourse or aquifer

Table J	
Lot on plan description for strategic port land	Port authority for the lot

Table K	
Name of local government for the tidal area (if applicable)	Port authority for the tidal area (if applicable)

8. Are there any existing easements on the premises? (e.g. for vehicular access, electricity, overland flow, water etc)

☒ No ☐ Yes—ensure the type, location and dimension of each easement is included in the plans submitted

9. Does the proposal include new building work or operational work on the premises? (Including any services)

☒ No ☐ Yes—ensure the nature, location and dimension of proposed works are included in plans submitted

10. Is the payment of a portable long service leave levy applicable to this application? (Refer to notes at the end of this form for more information.)

☒ No—go to question 12 ☐ Yes

11. Has the portable long service leave levy been paid? (Refer to notes at the end of this form for more information.)

☒ No
☐ Yes—complete Table L and submit with this application the yellow local government/private certifier's copy of the receipted QLeave form

Table L		
Amount paid	Date paid (dd/mm/yy)	QLeave project number (6 digit number starting with A, B, E, L or P)

12. Has the local government agreed to apply a superseded planning scheme to this application under section 96 of the *Sustainable Planning Act 2009*?

☒ No
☐ Yes—please provide details below

Name of local government	Date of written notice given by local government (dd/mm/yy)	Reference number of written notice given by local government (if applicable)

- 13. List below all of the forms and supporting information that accompany this application** (Include all IDAS forms, checklists, mandatory supporting information etc. that will be submitted as part of this application. Note: this question does not apply for applications made online using MyDAS)

Description of attachment or title of attachment	Method of lodgement to assessment manager
Brazier Motti Report 33762-001-01	Mail

14. Applicant's declaration

- ☒ By making this application, I declare that all information in this application is true and correct (Note: it is unlawful to provide false or misleading information)

Notes for completing this form

- Section 261 of the *Sustainable Planning Act 2009* prescribes when an application is a properly-made application. Note, the assessment manager has discretion to accept an application as properly made despite any non-compliance with the requirement to provide mandatory supporting information under section 260(1)(c) of the *Sustainable Planning Act 2009*

Applicant details

- Where the applicant is not a natural person, ensure the applicant entity is a real legal entity.

Question 1

- Schedule 3 of the Sustainable Planning Regulation 2009 identifies assessable development and the type of assessment. Where schedule 3 identifies assessable development as "various aspects of development" the applicant must identify each aspect of the development on Tables A, B and C respectively and as required.

Question 6

- Section 263 of the *Sustainable Planning Act 2009* sets out when the consent of the owner of the land is required for an application. Section 260(1)(e) of the *Sustainable Planning Act 2009* provides that if the owner's consent is required under section 263, then an application must contain, or be accompanied by, the written consent of the owner, or include a declaration by the applicant that the owner has given written consent to the making of the application. If a development application relates to a state resource, the application is not required to be supported by evidence of an allocation or entitlement to a state resource. However, where the state is the owner of the subject land, the written consent of the state, as landowner, may be required. Allocation or entitlement to the state resource is a separate process and will need to be obtained before development commences.

Question 7

- If the premises is listed on either the Contaminated Land Register (CLR) or the Environmental Management Register (EMR) under the *Environmental Protection Act 1994* it may be necessary to seek compliance assessment. Schedule 18 of the Sustainable Planning Regulation 2009 identifies where compliance assessment is required.

Question 11

- The *Building and Construction Industry (Portable Long Service Leave) Act 1991* prescribes when the portable long service leave levy is payable.
- The portable long service leave levy amount and other prescribed percentages and rates for calculating the levy are prescribed in the Building and Construction Industry (Portable Long Service Leave) Regulation 2002.

Question 12

- The portable long service leave levy need not be paid when the application is made, but the *Building and Construction Industry (Portable Long Service Leave) Act 1991* requires the levy to be paid before a development permit is issued.
- Building and construction industry notification and payment forms are available from any Queensland post office or agency, on request from QLeave, or can be completed on the QLeave website at www.qleave.qld.gov.au. For further information contact QLeave on 1800 803 481 or visit www.qleave.qld.gov.au.

Privacy—The information collected in this form will be used by the Department of State Development, Infrastructure and Planning (DSDIP), assessment manager, referral agency and/or building certifier in accordance with the processing and assessment of your application. Your personal details should not be disclosed for a purpose outside of the IDAS process or the provisions about public access to planning and development information in the *Sustainable Planning Act 2009*, except where required by legislation (including the *Right to Information Act 2009*) or as required by Parliament. This information may be stored in relevant databases. The information collected will be retained as required by the *Public Records Act 2002*.

IDAS form 5—Material change of use assessable against a planning scheme

(Sustainable Planning Act 2009 version 3.0 effective 1 July 2013)

This form must be used for development applications for a material change of use assessable against a planning scheme.

You **MUST** complete **ALL** questions that are stated to be a mandatory requirement unless otherwise identified on this form.

For all development applications, you must:

- complete *IDAS form 1—Application details*
- complete any other forms relevant to your application
- provide any mandatory supporting information identified on the forms as being required to accompany your application.

Attach extra pages if there is insufficient space on this form.

All terms used on this form have the meaning given in the Sustainable Planning Act 2009 (SPA) or the Sustainable Planning Regulation 2009.

This form must also be used for material change of use on strategic port land and Brisbane core port land under the *Transport Infrastructure Act 1994* and airport land under the *Airport Assets (Restructuring and Disposal) Act 2008* that requires assessment against the land use plan for that land. Whenever a planning scheme is mentioned, take it to mean land use plan for the strategic port land, Brisbane core port land or airport land.

This form can also be completed online using MyDAS at www.dsdip.qld.gov.au/MyDAS

Mandatory requirements

- 1. Describe the proposed use.** (Note: this is to provide additional detail to the information provided in question 1 of *IDAS form 1—Application details*. Attach a separate schedule if there is insufficient space in this table.)

General explanation of the proposed use	Planning scheme definition (include each definition in a new row) (non-mandatory)	No. of dwelling units (if applicable) or gross floor area (if applicable)	Days and hours of operation (if applicable)	No. of employees (if applicable)

- 2. Are there any current approvals associated with the proposed material change of use?** (e.g. a preliminary approval.)

☐ No ☐ Yes—provide details below

List of approval reference/s	Date approved (dd/mm/yy)	Date approval lapses (dd/mm/yy)

3. Does the proposed use involve the following? (Tick all applicable boxes.)

The reuse of existing buildings on the premises	<input type="checkbox"/> No	<input type="checkbox"/> Yes
New building work on the premises	<input type="checkbox"/> No	<input type="checkbox"/> Yes
The reuse of existing operational work on the premises	<input type="checkbox"/> No	<input type="checkbox"/> Yes
New operational work on the premises	<input type="checkbox"/> No	<input type="checkbox"/> Yes

Mandatory supporting information

4. Confirm that the following mandatory supporting information accompanies this application

Mandatory supporting information	Confirmation of lodgement	Method of lodgement
All applications		
<p>A site plan drawn to an appropriate scale (1:100, 1:200 or 1:500 are recommended scales) which shows the following:</p> <ul style="list-style-type: none"> the location and site area of the land to which the application relates (<i>relevant land</i>) the north point the boundaries of the relevant land any road frontages of the relevant land, including the name of the road the location and use of any existing or proposed buildings or structures on the relevant land (note: where extensive demolition or new buildings are proposed, two separate plans [an existing site plan and proposed site plan] may be appropriate) any existing or proposed easements on the relevant land and their function the location and use of buildings on land adjoining the relevant land all vehicle access points and any existing or proposed car parking areas on the relevant land. Car parking spaces for persons with disabilities and any service vehicle access and parking should be clearly marked for any new building on the relevant land, the location of refuse storage the location of any proposed retaining walls on the relevant land and their height the location of any proposed landscaping on the relevant land the location of any stormwater detention on the relevant land. 	<input type="checkbox"/> Confirmed	
A statement about how the proposed development addresses the local government's planning scheme and any other planning instruments or documents relevant to the application.	<input type="checkbox"/> Confirmed	
A statement about the intensity and scale of the proposed use (e.g. number of visitors, number of seats, capacity of storage area etc.).	<input type="checkbox"/> Confirmed	
<p>Information that states:</p> <ul style="list-style-type: none"> the existing or proposed floor area, site cover, maximum number of storeys and maximum height above natural ground level for existing or new buildings (e.g. information regarding existing buildings but not being reused) the existing or proposed number of on-site car parking bays, type of vehicle cross-over (for non-residential uses) and vehicular servicing arrangement (for non-residential uses). 	<input type="checkbox"/> Confirmed <input type="checkbox"/> Not applicable	

A statement addressing the relevant part(s) of the State Development Assessment Provisions (SDAP).	<input type="checkbox"/> Confirmed <input type="checkbox"/> Not applicable	
When the application involves the reuse of existing buildings		
Plans showing the size, location, existing floor area, existing site cover, existing maximum number of storeys and existing maximum height above natural ground level of the buildings to be reused.	<input type="checkbox"/> Confirmed <input type="checkbox"/> Not applicable	
When the application involves new building work (including extensions)		
Floor plans drawn to an appropriate scale (1:50, 1:100 or 1:200 are recommended scales) which show the following: <ul style="list-style-type: none"> the north point the intended use of each area on the floor plan (for commercial, industrial or mixed use developments only) the room layout (for residential development only) with all rooms clearly labelled the existing and the proposed built form (for extensions only) the gross floor area of each proposed floor area. 	<input type="checkbox"/> Confirmed	
Elevations drawn to an appropriate scale (1:100, 1:200 or 1:500 are recommended scales) which show plans of all building elevations and facades, clearly labelled to identify orientation (e.g. north elevation)	<input type="checkbox"/> Confirmed	
Plans showing the size, location, proposed site cover, proposed maximum number of storeys, and proposed maximum height above natural ground level of the proposed new building work.	<input type="checkbox"/> Confirmed <input type="checkbox"/> Not applicable	
When the application involves reuse of other existing work		
Plans showing the nature, location, number of on-site car parking bays, existing area of landscaping, existing type of vehicular cross-over (non-residential uses), and existing type of vehicular servicing arrangement (non-residential uses) of the work to be reused.	<input type="checkbox"/> Confirmed <input type="checkbox"/> Not applicable	
When the application involves new operational work		
Plans showing the nature, location, number of new on-site car parking bays, proposed area of new landscaping, proposed type of new vehicle cross-over (non-residential uses), proposed maximum new vehicular servicing arrangement (non-residential uses) of the proposed new operational work.	<input type="checkbox"/> Confirmed <input type="checkbox"/> Not applicable
