Attached is DA Form 1 duly completed, a photo of the subject tree, and a Qld Globe image.

Removal of a large swamp mahogany tree is requested as it is creating tension with neighbours who claim to be continually cleaning up debris and are concerned about the danger to life and property posed by falling branches in windy conditions. Branch shedding is a natural survival response for trees of this type.

The tree has a height of approximately 22m, with a girth of 3m, and a canopy about 15m across and despite its size will make little difference to the streetscape.

The following report provides supporting information to show compliance or otherwise with the DSC planning scheme and codes within.

Performance Outcomes	Acceptable Outcomes	Comments
For self-assessable and assessable development		
PO1 Vegetation is protected to ensure that: (a) the character and amenity of the local area is maintained; (b) vegetation damage does not result in fragmentation of habitats; (c) vegetation damage is undertaken in a sustainable manner; (d) the Shire's biodiversity and ecological values are maintained and protected; (e) vegetation of historical, cultural and / or visual significance is retained; (f) vegetation is retained for erosion prevention and slope stabilisation.	Response to this application will be based on performance outcomes.	Please refer also to comments on the cover page. (a) character and amenity of the area will not be affected greatly as this is a singular type of tree, located on the rear boundary, which consists predominately of low level bushes and various types of palm trees (b) removal of this tree will not create fragmentation of habitats as there will still be numerous trees featured along this boundary which will enable continuous paths of travel and cover (c) the tree will be removed by a professional tree removal company, with manageable branches chipped to remain on site (d) one tree is being removed for the sake of amenity and safety (e) n/a (f) n/a

CONCLUSION

The report includes supporting information intended to address any concerns Council may have as the assessing authority. The proposed tree removal is considered generally consistent with the performance outcomes of the relevant Planning Scheme Code.
