## DA Form 2 – Building work details

Approved form (version 1.2 effective 7 February 2020) made under Section 282 of the Planning Act 2016.

This form must be used to make a development application involving building work.

For a development application involving **building work only**, use this form (*DA Form 2*) only. The DA Forms Guide provides advice about how to complete this form.

For a development application involving **building work associated and any other type of assessable development** (i.e. material change of use, operational work or reconfiguring a lot), use *DA Form 1 – Development application details* **and** parts 4 to 6 of this form (*DA Form 2*).

Unless stated otherwise, all parts of this form **must** be completed in full and all required supporting information **must** accompany the development application.

One or more additional pages may be attached as a schedule to this development application if there is insufficient space on the form to include all the necessary information.

This form and any other form relevant to the development application must be used to make a development application relating to strategic port land and Brisbane core port land under the *Transport Infrastructure Act 1994*, and airport land under the *Airport Assets (Restructuring and Disposal) Act 2008*. For the purpose of assessing a development application relating to strategic port land and Brisbane core port land, any reference to a planning scheme is taken to mean a land use plan for the strategic port land, Brisbane port land use plan for Brisbane core port land, or a land use plan for airport land.

**Note:** All terms used in this form have the meaning given under the Planning Act 2016, the Planning Regulation 2017, or the Development Assessment Rules (DA Rules).

### PART 1 – APPLICANT DETAILS

1) Applicant details	
Applicant name(s) (individual or company full name)	Alfred Partridge
Contact name (only applicable for companies)	Patrick Clifton GMA Certification
Postal address (PO Box or street address)	PO Box 831
Suburb	Port Douglas
State	QLD
Postcode	4877
Country	Australia
Contact number	0438 755 374
Email address (non-mandatory)	Patrick.c@gmacert.com.au
Mobile number (non-mandatory)	0438 755 374
Fax number (non-mandatory)	
Applicant's reference number(s) (if applicable)	20203094

### PART 2 – LOCATION DETAILS

2) Location of the premises (complete 2.1 and 2.2 if applicable)
<b>Note</b> : Provide details below and attach a site plan for any or all premises part of the development application. For further information, see <u>DA</u> <u>Forms Guide: Relevant plans.</u>
2.1) Street address and lot on plan
Street address AND lot on plan (all lots must be listed), or
Street address AND lot on plan for an adjoining or adjacent property of the premises (appropriate for development in water but adjoining or adjacent to land e.g. jetty, pontoon. All lots must be listed).

Unit No.	Street No.	Street Name and Type	Suburb		
	8	Anchor Court	Killaloe		
Postcode	Lot No.	Plan Type and Number (e.g. RP,	SP) Local Gove	ernment Area(s)

### 1.0 Introduction

This report has been prepared on behalf of Alfred Partridge in support of a Development Application to Douglas Shire Council for a Development Permit for Building Work Assessable against the Planning Scheme for the purpose of a retaining Wall on land located at 8 Anchor Court, Killaloe, and described as Lot 2 on RP843599.

The application site is a single hillside rural lifestyle allotment and contains an area of 5,415m2 and with frontage to Anchor Court of approximately 55 metres. The site is currently developed with a dwelling house that is setback approximately 34 metres from the site frontage. The setback area is predominantly cleared of vegetation and maintained as curtilage to the dwelling house. Access to the site is provide by a single driveway from Anchor Court located to the northern end of the frontage.

The site has been the subject of a recent approval for a Domestic Outbuilding on the site, which has resulted in spoil being available. It is proposed to construct a retaining wall to adjacent the house and use the spoil to extend the level area adjacent the house.

The application is considered to be building works and is identified as being Code Assessable. Consideration can only be given to the Assessment Benchmarks contained in the Planning Scheme. The proposed development is considered to be consistent with the Assessment Benchmarks and is considered to be a suitable development on the site.

The application is submitted for approval, subject to reasonable and relevant conditions.

## 2.0 Development Summary

### 3.0 Site and Locality

The application site is a single regularly shaped rural lifestyle allotment located at 8 Anchor Court, Killaloe, and described as Lot 2 on RP843599. The site contains an area of 5,415m<sup>2</sup> and has frontage to Anchor Court of approximately 55 metres.

The site is a hillside site and has a slope of approximately 30 metres over the 95 mere length of the lot. A dwelling house has been constructed approximately 37 metres from the site frontage with the setback area cleared of vegetation and maintained as garden. The area to the rear of the house is covered with mature vegetation.

The locality containing the site is rural and rural lifetsyle in character. The development to the wets of Anchor Court is predominantly dwelling houses on Ryral Lifetsyle allotments and to the east land is under cultivation for sugar cane.

Photo 1 – Site Location (Source Queensland Globe)

### 4.0 Proposal

It is proposed to build a retaining wall on the site. It would be located below the site of the Dwelling House and would extend to the driveway.

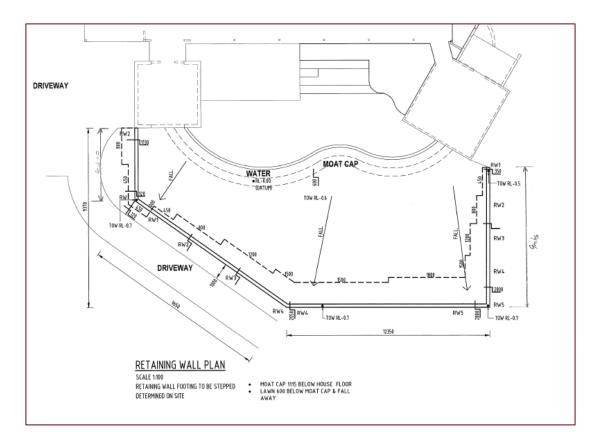

Image 1 - Site Plan

The retaining wall would vary in height and would vary from 600m in height to 2.4 metres in height.

The construction of a retaining wall with a height exceeding 2.4 metres is building works and the structural assessment of the retaining wall would form part of the subsequent approval of building works.

Proposal Plans are attached at Appendix 1.

### 5.0=Statutory Planning Considerations

This section provides a summary of the legislative framework affecting the application pursuant to the Planning Act 2016.

### 5.1 Planning Act 2016

### **5.1.1 Categorisation of Development**

The proposed development is not identified as prohibited development having regard to the relevant instruments that can prohibit development under the *Planning Act 2016*, including

- Schedule 10 of the Planning Regulations 2017
- Relevant Categorising Instruments.

The development is made assessable under the Douglas Shire Council Planning Scheme, which is a categorising instrument for the purpose of s43 of the *Planning Act 2016*.

### **5.1.2 Assessment Manager**

Pursuant to Schedule 8 of the *Planning Regulations 2017*, the Assessment Manager for the application is the Douglas Shire Council.

### 5.1.3 Level of Assessment

The application involves Building Works the development of a Retaining Wall. The table below identifies the level of assessment and the categorising section of the Douglas Shire Council Planning Scheme.

Development	Categorising Section	Level of Assessment
Building Works –	Table 5.6.d – Environmental	Code Assessable
Domestic	Management Zone	
Outbuilding		

### **5.1.4 Statutory Considerations for Assessable Development**

As the application is subject to Code Assessment, in deciding the application pursuant to s60 of the *Planning Act 2016*, the Council, as Assessment Manager, can only have regard to the matters established in the relevant planning benchmarks.

This assessment is further discussed in Section 6.0 of this report and a detailed assessment of the proposed development against the assessment benchmarks is provided at Appendix 3.

### 5.1.5 State Planning Policy

It is understood that the Minister has identified that the State Planning Policy has been appropriately integrated into in the Douglas Council Planning Scheme and consequently no further assessment is required in this instance.

### 5.1.6 Regional Plan

The application site is identified in the Regional Landscape and Rural Production Area designation of the FNQ Regional Plan. Consistent with the State Planning Policies, it is understood that the Planning Scheme has been determined to appropriately advance the Regional Plan and, on that basis, no further assessment is required in this instance.

### **5.1.7 Referral Agencies**

There are no referral agencies identified in respect of this application.

### **5.1.8 State Development Assessment Provisions**

As there are no referral agencies for the application, no State Development Assessment Provisions Apply to the assessment.

### 6.0 Local Planning Considerations

### 6.1 Douglas Shire Council Planning Scheme

Within the Douglas Shire Council Planning Scheme (2018), the site is identified within the Environmental Management Zone and is affected by the following Overlays:

- Bushfire Hazard Overlay;
- Hillslopes Overlay;
- Natural Areas Overlay; and,
- Potential Landslide Hazard Overlay

The Table below identifies the applicable Assessment Benchmarks contained within the Planning Scheme.

Assessment Benchmark	Applicability	Compliance
Environmental Management Zone Code	Applies	Complies with applicable Acceptable Outcomes.
Bushfire Hazard Overlay Code	Applies	Complies with all applicable Acceptable Outcomes.
Hillslopes Overlay Code	Applies	Consideration of Performance Outcomes PO2 and PO3 is required. See below.
Natural Areas Overlay Code	Applies	Complies with all applicable Acceptable Outcomes.
Potential Landslide Hazard Overlay Code	Applies	Consideration of Performance Outcome PO2 is required. See below.
Access, Parking and Servicing Code	Not applicable	The application is for building work only and the code applies to Operational Work or Material Change of use or Reconfiguring a Lot only.
Filling and Excavation Code	Applies	Consideration of Performance Outcome PO1 is required. See

		below.
Infrastructure Works	Not applicable	The application is for
Code		building work only and the
		code applies to
		Operational Work or
		Material Change of use or
		Reconfiguring a Lot only.

### 6.1.1 Statement of Compliance – Benchmark Assessment

### 6.1.1.1 Hillslopes Overlay Code

Performance Outcomes PO2 and PO3 of the Hillslopes Overlay Code state, respectively:

The landscape character and visual amenity quality of hillslopes areas is retained to protect the scenic backdrop to the region.

and

Excavation or filling does not have an adverse impact on the amenity, safety, stability or function of the site or adjoining premises through:

- (a) loss of privacy;
- (b) loss of access to sunlight;
- (c) intrusion of visual or overbearing impacts;
- (d) complex engineering solutions.

The proposed retaining wall would be located on the lower part of the site below the existing dwelling house and would retain the scenic backdrop to the region. In addition. The retaining wall would be located below the adjacent houses and would:

- not result in the loss of privacy;
- not result in the loss of access to sunlight;
- not result in visual or overbearing impacts; and,
- not require complex engineering solutions.

The proposed development is considered to satisfy Acceptable Outcomes and relevant Performance Outcomes where the Acceptable Outcomes are not satisfied.

### 6.1.1.2 Potential Landslide Hazard Overlay Code

Performance Outcome PO2 states:

The siting and design of necessary retaining structures does not cause an adverse visual impact on landscape character or scenic amenity quality of the area.

The proposed retaining wall would be located in an existing cleared area and below the existing dwelling house. It would not be visually prominent given existing development and would retain the scenic backdrop to the region and landscape character of the area. The proposed development complies with the performance outcome.

### 6.1.1.3 Filling and Excavation Code Code

### Performance Outcome PO1 states:

All filling and excavation work does not create a detrimental impact on the slope stability, erosion potential or visual amenity of the site or the surrounding area.

The proposed retaining wall would be located below the existing dwelling house and would retain the scenic backdrop to the region. In addition, excavation and fill would be below the adjacent houses and would:

- not impact on slope stability;
- not increase erosion potential; or
- result in visual or overbearing impacts.

### 7.0 Summary and Conclusion

This report has been prepared on behalf of Alfred Partridge in support of a Development Application to Douglas Shire Council for a Development Permit for Building Work Assessable against the Planning Scheme for the purpose of a retaining Wall on land located at 8 Anchor Court, Killaloe, and described as Lot 2 on RP843599.

The application site is a single hillside rural lifestyle allotment and contains an area of 5,415m2 and with frontage to Anchor Court of approximately 55 metres. The site is currently developed with a dwelling house that is setback approximately 34 metres from the site frontage. The setback area is predominantly cleared of vegetation and maintained as curtilage to the dwelling house. Access to the site is provide by a single driveway from Anchor Court located to the northern end of the frontage.

The site has been the subject of a recent approval for a Domestic Outbuilding on the site, which has resulted in spoil being available. It is proposed to construct a retaining wall to adjacent the house and use the spoil to extend the level area adjacent the house.

The application is considered to be building works and is identified as being Code Assessable. Consideration can only be given to the Assessment Benchmarks contained in the Planning Scheme. The proposed development is considered to be consistent with the Assessment Benchmarks and is considered to be a suitable development on the site.

The application is submitted for approval, subject to reasonable and relevant conditions.

# Appendix 2.

# **PROPOSAL PLANS**

#### **GENERAL NOTES**

- THE ENGINEERING NOTES UNDER THE JOB NUMBER ABOVE ARE PART OF THE DRAWINGS, AND ARE TO BE ATTACHED TO EACH SET OF DRAWINGS TO BE WORKED FROM.
- ENGINEERING DRAWINGS SHALL BE READ IN CONJUNCTION WITH ALL
  ARCHITECTURAL AND OTHER CONSULTANTS' DRAWINGS AND SPECIFICATIONS,
  AND WITH SUCH OTHER WRITTEN INSTRUCTIONS AS MAY BE ISSUED DURING THE
  COURSE OF THE CONSTRUCTION. ANY DISCREPANCIES SHALL BE REFERRED TO THE
  ENGINEER BEFORE PROCEEDING WITH THE WORK.
- 3. ALL MATERIALS AND WORKMANSHIP SHALL BE IN ACCORDANCE WITH THE RELEVANT AND CURRENT SAA CODES, AND BY-LAWS AND ORDINANCES OF THE RELEVANT BUILDING AUTHORITIES, EXCEPT WHERE VARIED BY THE PROJECT SPECIFICATION.
- 4. ALL RELEVANT DIMENSIONS SHOWN SHALL BE VERIFIED BY THE BUILDER ON SITE. ENGINEERS' DRAWINGS SHALL NOT BE SCALED FOR DIMENSIONS.
- 5. DURING CONSTRUCTION THE STRUCTURE WITH IT'S ALL STRUCTURAL ELEMENTS SHALL NOT BE OVERSTRESSED, AND SHALL BE MAINTAINED IN A STABLE CONDITION. TEMPORARY SHORING, PROPPING AND BRACING SHALL BE PROVIDED BY THE BUILDER TO KEEP ALL EXCAVATIONS AND THE STRUCTURE STABLE AT ALL TIMES.
- 6. UNLESS NOTED OTHERWISE ALL LEVELS ARE IN METRES AND ALL DIMENSIONS ARE IN MILLIMETRES.
- 7. THE STRUCTURAL COMPONENTS DETAILED ON THE DRAWINGS HAVE BEEN DESIGNED IN ACCORDANCE WITH THE RELEVANT CODES AND LOCAL GOVERNMENT ORDINANCES FOR THE LOADINGS INDICATED.
- 8. UNO STANDS FOR 'UNLESS NOTED OTHERWISE'.

#### SERVICE LOADS

1. LIVE LOADS TO AS 1170, PART 1

ROOF 0.25 KPA

INTERNAL SUSPENDED FLOOR 3 KPA
WIND LOADS TO AS 1170, PART 2

WIND LOADS TO AS 1170, PART 2
 REGION "C2", DESIGN GUST WIND SPEED 61m/s ULTIMATE LIMIT STATE.

#### FOOTINGS

- 1. THE BUILDER SHALL FAMILIARISE HIMSELF WITH THE CONTENTS OF THE SOILS REPORT WHERE AVAILABLE AND STRICTLY ADHERE TO THE RECOMMENDATIONS CONTAINED THEREIN. ALL FOOTINGS ARE TO BE INSPECTED AND APPROVED PRIOR TO PLACING CONCRETE.
- FOOTINGS SHALL BE LOCATED CENTRALLY UNDER COLUMNS AND WALLS, AND STRIP FOOTINGS SHALL BE CAST ON HORIZONTALLY EXCAVATED BENCHES, UNLESS SPECIFICALLY DETAILED OTHERWISE.
- 3. THE DESIGN OF THE STRUCTURE HAS BEEN BASED ON THE FOUNDATION HAVING A MINIMUM BEARING CAPACITY OF 100 kPa.
- 4. FOOTINGS ARE TO BE CONSTRUCTED AND BACK FILLED AS SOON AS POSSIBLE FOLLOWING EXCAVATION TO AVOID SOFTENING OR DRYING OUT DUE TO EXPOSURE.

#### CONCRETE AND REINFORCEMENT

- . ALL CONCRETE WORK SHALL BE IN ACCORDANCE WITH AS 3600 CONCRETE STRUCTURE CODE.
- 2. CONCRETE SPECIFICATION SHALL BE:

 ELEMENT
 GRADE
 SLUMP
 MAX AGG

 FILLING 200cm & 300cm
 N20
 230+30
 10

 GROUND SLAB & FOOTINGS
 N25
 80+15
 2

- REINFORCEMENT IS SHOWN DIAGRAMMATICALLY; IT IS NOT NECESSARILY SHOWN IN TRUE PROJECTION. WHERE TRANSVERSE TIE BARS ARE NOT SHOWN, PROVIDE N12–300.
- ALL REINFORCEMENT SHALL BE IN ACCORDANCE WITH AS 4671.

SYMBOLS:

F, RF, SL HARD DRAWN WIRE REINFORCING FABRIC

R STRUCTURAL GRADE 230R ROUND BAR

S STRUCTURAL GRADE 230S DEFORMED BAR
HOT ROLLED GRADE 410Y DEFORMED BAR

N GRADE 500N DEFORMED BAR

N GRADE BAR MAY BE SUBSTITUTED FOR Y GRADE BAR.

5. COVER TO REINFORCEMENT SHALL BE:

FOOTINGS IN GROUND 75mm BOTTOM, 65mm SIDES AND TOP

(b) FOOTINGS ON MEMBRANE 50mm BOTTOM

(c) WITHIN CONCRETE MASONRY BLOCK – 10mm.

6. REINFORCEMENT SHALL BE SUPPORTED ON APPROVED CHAIRS AT 800mm CENTRES.

7. SPLICE LAPS UNLESS SHOWN OTHERWISE:

FABRIC - 1 COMPLETE MESH + 50mm, DEFORMED BAR - 30 X BAR DIAMETER MINIMUM.

8. CONSTRUCTION JOINTS SHALL BE SCABBLED AND CLEANED AND COATED WITH CEMENT/WATER SLURRY IMMEDIATELY PRIOR TO PLACING CONCRETE.

- 9. CONCRETE SHALL BE COMPACTED USING MECHANICAL VIBRATORS.
- CONCRETE SHALL BE CURED TO AS 3799 FOR A MINIMUM OF 7 DAYS BY A METHOD APPROVED BY THE ENGINEER.
- CONTROL JOINTS SHALL BE CONSTRUCTED AS SPECIFIED. SAW CUTTING SHALL BE CARRIED OUT WITHIN 6 HOURS OF CONCRETE HARDENING.

#### **BLOCKWORK**

- ALL BLOCK WORK SHALL BE IN ACCORDANCE WITH AS 3700 MASONRY CODE.
- 2. CONCRETE BLOCKS SHALL BE TO AS 3700, GRADE 15.
- 3. CONCRETE CORE FILLING SHALL COMPLY WITH THE NOTES ON "CONCRETE AND REINFORCEMENT". ALL REINFORCED BLOCKS SHALL BE CONCRETE FILLED.
- 4. MORTAR USED FOR MASONRY THAT IS TO BE REINFORCED AND GROUTED SHALL BE TO AS 3700 CLASSIFICATION M4:- 1 PART CEMENT, 0.25 PART LIME AND 3 PARTS SAND.
- 5. BOND BEAM REINFORCING SHALL BE CONTINUOUS AT WALL INTERSECTIONS AND BARS ANCHORED AND LAPPED TO DEVELOP FULL TENSILE STRENGTH.
- CLEAN OUT BLOCKS SHALL BE PROVIDED AT THE BASE OF ALL CORES TO BE CONCRETE FILLED.
   ALTERNATIVELY, THE BUILDER SHALL OPEN SUCH CORES FOR CLEANING BY AN APPROVED METHOD.
- ALL CORES TO BE CONCRETE FILLED SHALL BE CLEANED OUT BY HOSING PRIOR TO FINAL SETTING OF MORTAR AT ALL LIFTS, OR BY RODDING TO CLEANOUT PRIOR TO CONCRETE FILLING.
- FILL CORES TO MAXIMUM 3.0M HIGH FREE DROP IN ANY ONE POUR. STOP POUR 50MM BELOW TOP OF BLOCK TO PROVIDED KEY FOR FOLLOWING POUR.
- 9. CORE GROUT IS TO BE COMPACTED TO ENSURE COMPLETE FILLING OF ALL CORES.
- 10. LINTEL BEAMS SHALL BE PROPPED FOR 28 DAYS AFTER CONCRETING.
- 11. RETAINING WALLS SHALL BE APPROPRIATELY PROPPED UNTIL CORE FILL HAS ATTAINED DESIGN STRENGTH IF BACK FILL IS TO BE PLACED BEHIND THE WALL.
- 12. RETAINING WALLS TO BE PERMANENTLY TIED OR SUPPORTED AT THEIR TOP SHALL BE TEMPORARILY PROPPED FOR BACKFILLING UNTIL THE SUPPORTING STRUCTURE HAS ATTAINED DESIGN STRENGTH.
- 13. CONTROL JOINTS SHALL BE PLACED IN ALL BLOCK WORK WALLS AT 12.0M MAXIMUM CRS, SPACING UNLESS NOTED OTHERWISE.
- 14. THE FOLLOWING CONCRETE MASONRY BLOCK WORK SHALL BE FULLY CORE FILLED:
  (a) ALL RETAINING WALL

INTERNAL WALLS SHALL BE TIED TO EXTERNAL WALLS AT ALL BOND BEAMS AND AT EVERY 3RD COURSE AS PER CODE.

### STEELWORK

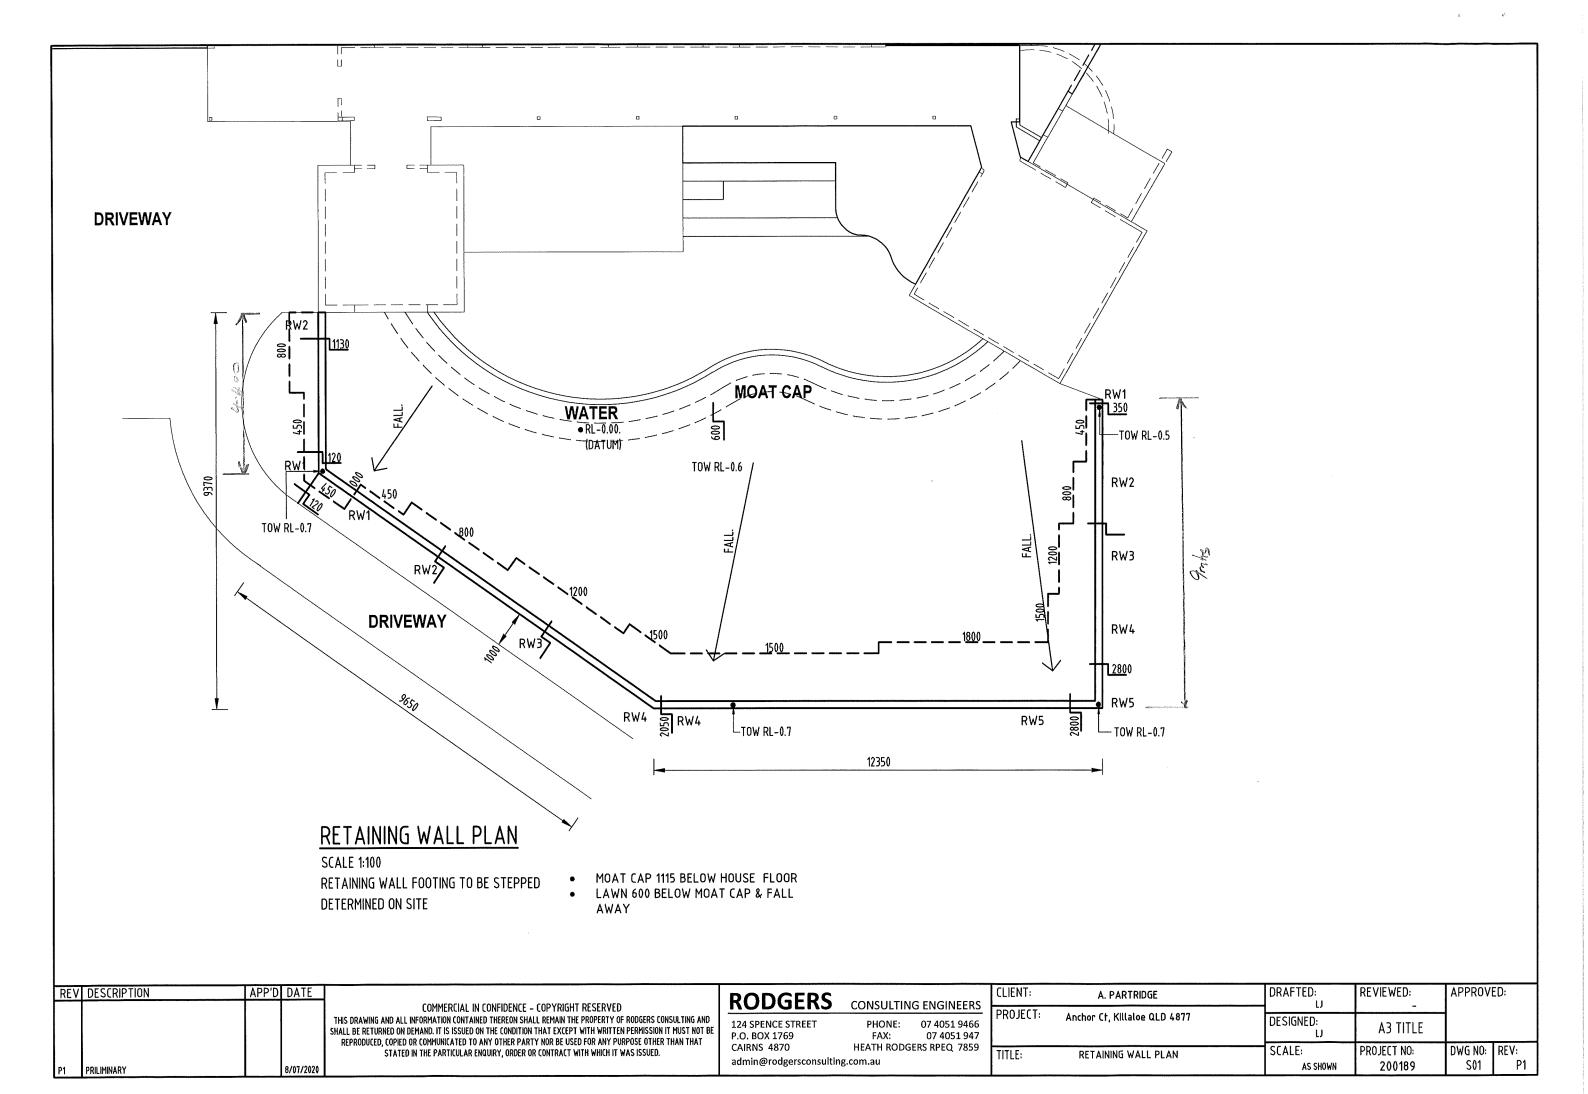

- ALL STEELWORK SHALL BE IN ACCORDANCE WITH AS 4100 STEEL STRUCTURES CODE, AND AS 4600 -COLD FORMED STEEL STRUCTURES CODE.
- THE CONTRACTOR SHALL PROVIDE AND SUPPLY ANY ADDITIONAL TEMPORARY BRACING ETC. NECESSARY TO ADEQUATELY AND SAFELY HOLD STEELWORK IN POSITION DURING CONSTRUCTION.
- 3. ALL WELDING SHALL BE IN ACCORDANCE WITH AS 1554 STRUCTURAL STEEL WELDING CODE.
- 4. ALL STEELWORK EXPOSED TO THE WEATHER SHALL BE GALVANISED OR UNDERCOAT PAINTED WITH ONE COAT 0.075mm MINIMUM DRY THICKNESS OF TWO PACK INORGANIC AIR CURED ZINC SILICATE APPLIED WITHIN 2 HOURS OF APPROVED PREPARATION, SUCH UNDERCOAT SHALL BE TOP COAT PROTECTED TO THE APPROVAL OF THE ARCHITECT / DESIGNER.
- 5. GALVANISING WITH HOT DIPPING SHALL BE TO AS 1627 AND AS/NZS 4680.
- 6. PAINTING AND PREPARATION SHALL BE TO MANUFACTURER'S SPECIFICATION.
- IF NOT OTHERWISE SPECIFIED ABRASIVE CLEANING PRIOR TO PAINTING SHALL BE CLASS 2.5 TO AS 1627.4.
- 8. BOLTS SHALL BE GALVANISED. A SUITABLE WASHER SHALL BE USED UNDER ALL NUTS.
- BOLT LEGEND 4.6S COMMERCIAL GRADE 4.6 BOLTS, SNUG TIGHTENED.
  - 1. 8.8S HIGH STRENGTH GRADE 8.8 BOLTS, SNUG TIGHTENED.
- 10. UNLESS OTHERWISE SPECIFIED, THE FOLLOWING SHALL APPLY:
  - A. CLEATS, BRACKETS, STIFFENERS ETC. EX. 6mm PLATE
  - B. WELDING 6mm CONTINUOUS FILLET TO FULL PERIMETER AT CONTACT
  - C. BOLT HOLE CLEARANCE 2mm, HOLD DOWN BOLT HOLE CLEARANCE 4mm
  - D. ALL BOLTS CAST INTO CONCRETE TO BE HOT DIPPED GALVANISED
  - E. BUTT WELDS SHALL BE QUALIFIED COMPLETE PENETRATION IN ACCORDANCE WITH AS 1554.1
  - F. END PLATES TO ALL HOLLOW MEMBERS SHALL BE EQUAL TO WALL THICKNESS OR MINIMUM 4mm. PROVIDE 'BREATHER' HOLES IF MEMBERS ARE TO BE HOT DIPPED GALVANISED.
  - G. CONNECTIONS MINIMUM OF 2-M16 4.6/S BOLTS.
  - BRACING SHALL INTERSECT ON CENTERLINES OF MEMBERS.
- 11. FABRICATOR SHALL ALLOW FOR ALL CLEATS AND OTHER FIXINGS REQUIRED.
  ALL BEAMS HAVING A NATURAL CAMBER WITHIN THE STRAIGHTNESS
  TOLERANCE SHALL BE ERECTED WITH THE CAMBER UP. BEAMS AND TRUSSES
  OVER 6.0m SPANS SHALL BE PRE CAMBERED 1 IN 500 ( UNO ).
- 12. ALL PURLINS AND GIRTS, FIXINGS AND ACCESSORIES, SHALL BE GALVANISED COLD FORMED. INSTALLATION OF ALL ACCESSORIES SHALL BE TO THE MANUFACTURER'S SPECIFICATION.
- 13. METAL ROOF CLADDING INSTALLED WITH METAL ROOF BATTENS SHALL HAVE THE CLADDING, BATTENS WITH BATTEN SPACING, AND FIXINGS, CERTIFIED BY THE SUPPLIER FOR THE NOMINATED PROFILE, FOR THE WIND LOAD NOMINATED ON PAGE 1, THE LOADING NOTES. THEY SHALL BE COMPLIANT WITH CURRENT AUSTRALIAN STANDARDS AND CODES OF PRACTICE.

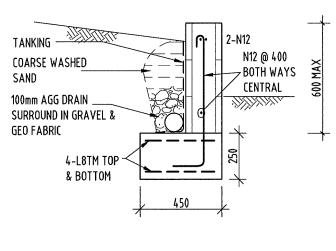

### **BUILDING PLATFORM PREPARATION**

- 1. BUILDING PLATFORM PREPARATION SHALL BE CARRIED OUT IN ACCORDANCE WITH AS 3798, GUIDELINES ON EARTHWORKS FOR COMMERCIAL AND RESIDENTIAL DEVELOPMENT, AND OTHERWISE AS DIRECTED IN THE ENGINEERING DOCUMENTATION.
- 2. ALL WORK INCLUDING ANY TESTING SHALL BE CARRIED OUT IN ACCORDANCE WITH THE RELEVANT AUSTRALIAN STANDARDS AND CODES OF PRACTICE, IN PARTICULAR AS 2870 RESIDENTIAL SLABS AND FOOTINGS
- 3. STRIP BUILDING PLATFORM OF TOPSOIL, DELETERIOUS ORGANICS, AND ANY OTHER DELETERIOUS MATERIAL.
- 4. COMPACT THE EXPOSED SUBGRADE WITH SUITABLE EQUIPMENT TO A MINIMUM DRY DENSITY RATIO 95% USING STANDARD COMPACTION, OR A DENSITY INDEX OF AT LEAST 70%.
- RAISE BUILDING PAD A MAXIMUM OF 300MM WITH APPROVED SAND OR CRUSHERDUST FILL COMPACTED TO A DENSITY INDEX OF AT LEAST 70%.

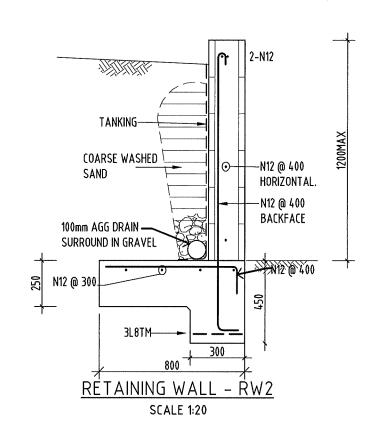

FOUNDATION MAINTENANCE SHALL BE IN ACCORDANCE WITH THE CSIRO BROCHURE, "GUIDE TO HOME OWNERS ON FOUNDATION MAINTENANCE AND FOOTING PERFORMANCE".

## Appendix 3.

# PLANNING BENCHMARK ASSESSMENT

### 6.2.4 Environmental management zone code

### 6.2.6.1 Application

- (1) This code applies to assessing development in the Environmental management zone.
- (2) When using this code, reference should be made to Part 5.

### **6.2.4.2 Purpose**

(1) The purpose of the Environmental management zone code is to recognise environmentally sensitive areas and provide for houses on lots and other low impact activities where suitable.

These areas are protected from intrusion of any urban, suburban, centre or industrial land use.

- (2) The local government purpose of the code is to:
  - (a) implement the policy direction set in the Strategic Framework, in particular:
    - (i) Theme 2: Environment and landscape values, Element 3.5.3 Biodiversity, Element 3.5.5 Scenic amenity.
- (b) protect and buffer areas of environmental significance from inappropriate development.
- (3) The purpose of the code will be achieved through the following overall outcomes:
  - (a) Development is generally restricted to a dwelling house;
  - (b) Adverse impacts on natural systems, both on-site and on adjoining land are minimised through the location, design and management of development;
  - (c) Development reflects and responds to the natural features and environmental values of the area;

- (d) Visual impacts are minimised through the location and design of development;
- (e) Development does not adversely affect water quality;
- (f) Development responds to land constraints, including but not limited to topography, vegetation, bushfire, landslide and flooding.

### 6.2.4.3 Criteria for assessment

Table 6.2.4.3.a – Environmental management zone – assessable development

Performance outcomes	Acceptable outcomes	Compliance			
For self-assessable and assessable development					
PO1	AO1	Complies with AO1			
The height of all buildings and structures is in keeping with the natural characteristics of the site. Buildings and structures are low-rise and not unduly visible from external sites	Buildings and structures are not more than 8.5 metres and two storeys in height.  Note – Height is inclusive of the roof height.	The proposed retaining wall would be 2.4 metres in height.			
	AO1.2	Not applicable			
	Buildings have a roof height of less than 2 metres	A retaining wall does not have a roof.			
PO2	AO2	Complies with AO2			

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
Buildings and structures are set back to:  (a) maintain the natural character of the area; (b) achieve separation from neighbouring buildings and from road frontages	Buildings and structures are set back not less than:  (a) 40 metres from the frontage of a state controlled road; (b) 25 metres from the frontage to Cape Tribulation Road; (c) 6 metres from any other road; (d) 6 metres from the side and rear boundaries of the site.	The proposed retaining wall would be setback more than the required setbacks.
For assessable development		
PO3	AO3	Not applicable
Development is consistent with the purpose of the Environmental management zone and protects the zone from the intrusion of inconsistent uses.	Inconsistent uses as identified in Table 6.2.4.3.b are not established in the Environmental management zone.	The proposed development is for building works only.
PO4	AO4	Complies with PO4
The site coverage of all buildings and structures and associated services do not have an adverse	No acceptable outcomes are prescribed.	There would be no increase in site coverage as a result of the development.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
effect on the environmental or scenic values of the site.		
PO5	AO5.1	Complies with AO5.1
Development is located, designed, operated and managed to respond to the characteristics, features and constraints of the site and its surrounds.  Note - Planning scheme policy – Site assessments provides guidance on identifying the characteristics, features and constraints of a site and its surrounds.	Buildings, structures and associated access, infrastructure and private open space are sited:  (a) within areas of the site which are already cleared; or (b) within areas of the site which are environmentally degraded; (c) to minimise additional vegetation clearing.	The area of development has already been cleared of any native vegetation.
	AO5.2  Buildings and structures and associated infrastructure are not located on slopes greater than 1 in 6 (16.6%) or on a ridgeline	Complies with O6.1  Refer below
PO6	AO6.1	Complies with AO6.1

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
Buildings and structures are responsive to steep slope through innovative construction techniques so as to:  (a) maintain the geotechnical stability of	Where development on land steeper than 1 in 6 (16.6%) cannot be avoided, development follows the natural contours of the land and single plane concrete slab on-ground methods of construction are not utilised.	The proposal is for a retaining wall that does not involve slab on ground construction.
slopes; (b) minimise cut and/or fill;	AO6.2	Not applicable
(c) minimise the overall height of development	Access and vehicle manoeuvring and parking areas are constructed and maintained to:  (a) minimise erosion; (b) minimise cut and fill; (c) follow the natural contours of the site.	The development would not affect existing access and parking arrangements.
P07	A07	Able to comply with AO7
The exterior finishes of buildings and structures are consistent with the surrounding natural environment	The exterior finishes and colours of buildings and structures are non-reflective and are moderately dark to darker shades of grey, green, blue and brown or the development is not visible external to the site.	The exterior finish of the retaining wall would be selected to complement the existing dwelling house. Council are invited to attach a condition to any approval to secure compliance if necessary.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
PO8	AO8	Complies with PO8
Development does not adversely affect the amenity of the zone and adjoining land uses in terms of traffic, noise, dust, odour, lighting or other physical or environmental impacts.	No acceptable outcomes are prescribed.	The proposed retaining wall would not result in any greater impact than the existing development.
PO9	AO9	Complies with AO9
The density of development ensures that the environmental and scenic amenity values of the site and surrounding area are not adversely affected.	The maximum residential density is one dwelling house per lot.	The proposal would not result in an increase in residential density.
PO10	AO10	Not applicable
Lot reconfiguration results in no additional lots.	No acceptable outcomes are prescribed.	No new lots are proposed.
Note - Boundary realignments to resolve encroachments and lot amalgamation are considered appropriate.		

### 8.2.2 Bushfire hazard overlay code

Note - Land shown on the bushfire hazard overlay map is designated as the bushfire prone area for the purposes of section 12 of the Building Regulations 2006. The bushfire hazard area (bushfire prone area) includes land covered by the high and medium hazard areas as well as the buffer area category on the overlay map.

### 8.2.2.1 Application

- (1) This code applies to assessing a material change of use, reconfiguring a lot, operational works or building work in the Bushfire hazard overlay, if:
  - (a) self-assessable or assessable where the code is identified as being applicable in the Assessment criteria for the Overlay Codes contained in the Levels of Assessment Tables in section 5.6;
  - (b) impact assessable development.
- (2) Land in the Bushfire hazard overlay is identified on the Bushfire hazard overlay map in Schedule 2 and includes the following sub-categories:
  - (a) Medium bushfire risk sub-category;
  - (b) High bushfire risk sub-category;
  - (c) Very high bushfire risk sub-category;
  - (d) Potential impact buffer sub-category.
- (3) When using this code, reference should be made to Part 5.

### 8.2.2.2 Purpose

- (1) The purpose of the Bushfire overlay code is to:
  - (a) implement the policy direction in the Strategic Framework, in particular:
    - (i) Theme 1 Settlement pattern: Element 3.4.7 Mitigation of hazards;

- (ii) Theme 6 Infrastructure and transport: Element 3.9.2 Energy.
- (b) enable an assessment of whether development is suitable on land within the Bushfire risk overlay sub-categories.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) development avoids the establishment or intensification of vulnerable activities within or near areas that are subject to bushfire hazard;
  - (b) development is designed and located to minimise risks to people and property from bushfires;
  - (c) bushfire risk mitigation treatments are accommodated in a manner that avoids or minimises impacts on the natural environment and ecological processes;
  - (d) development involving the manufacture or storage of hazardous materials does not increase the risk to public safety or the environment in a bushfire event;
  - (e) development contributes to effective and efficient disaster management response and recovery capabilities.

Note - A site based assessment may ground-truth the extent of hazardous vegetation and extent and nature of the bushfire hazard area (bushfire prone area). Such assessments should be undertaken using the methodology set out in Planning scheme policy SC6.9 - Natural Hazards.

# 8.2.2.3 Criteria for assessment Table 8.2.2.3.a – Bushfire hazard overlay code –assessable development

Performance outcomes	Acceptable outcomes	Compliance
For self-assessable and assessable development		
Compatible development		
P01	AO1	Complies with AO1
A vulnerable use is not established or materially intensified within a bushfire hazard area (bushfire prone area) unless there is an overriding need or other exceptional circumstances.  Note - See the end of this code for examples of vulnerable uses.	Vulnerable uses are not established or expanded.  Note – Where, following site inspection and consultation with Council, it is clear that the mapping is in error in identifying a premises as being subject to a medium, high, very high bushfire hazard or potential impact buffer sub-category, Council may supply a letter exempting the need for a Bushfire Management Plan.  Note – Where the assessment manager has not previously approved a Bushfire Management Plan (either by condition of a previous development approval), the development proponent will be expected to prepare such a plan.  Note – Planning scheme policy SC6.9 - Natural hazards, provides a guide to the preparation of a	The proposal does not involve a vulnerable use.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	Bushfire Management Plan.	
PO2	AO2	Complies with AO2
Emergency services and uses providing community support services are able to function effectively during and immediately after a bushfire hazard event.	Emergency Services and uses providing community support services are not located in a bushfire hazard sub-category and have direct access to low hazard evacuation routes.	The proposal does not involve Emergency Services.
PO3	AO3	Complies with AO3
Development involving hazardous materials manufactured or stored in bulk is not located in bushfire hazard sub-category.	The manufacture or storage of hazardous material in bulk does not occur within bushfire hazard subcategory.	The proposal does not involve hazardous materials.
Development design and separation from bushfire hazard – reconfiguration of lots		
PO4.1	AO4.1	Not applicable
Where reconfiguration is undertaken in an urban area or is for urban purposes or smaller scale rural residential purposes, a separation distance from hazardous vegetation is provided to achieve a radiant heat flux level of 29kW/m² at the edge of	No new lots are created within a bushfire hazard sub-category.  or	The development is not for reconfiguring a lot.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
the proposed lot(s).  Note - "Urban purposes" and "urban area" are defined in the Sustainable Planning Regulations 2009.  Reconfiguration will be taken to be for rural residential purposes where proposed lots are between 2000m² and 2ha in area. "Smaller scale" rural residential purposes will be taken to be where the average proposed lot size is 6000m² or less.  Note - The radiant heat levels and separation distances are to be established in accordance with method 2 set out in AS3959-2009.		
Where reconfiguration is undertaken for other purposes, a building envelope of reasonable dimensions is provided on each lot which achieves radiant heat flux level of 29kW/m² at any point.	Lots are separated from hazardous vegetation by a distance that:  (a) achieves radiant heat flux level of 29kW/m² at all boundaries; and  (b) is contained wholly within the development site.  Note - Where a separation distance is proposed to be achieved by utilising existing cleared developed areas	Not applicable  The development is not for reconfiguring a lot.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	external to the site, certainty must be established (through tenure or other means) that the land will remain cleared of hazardous vegetation.  For staged developments, temporary separation distances, perimeter roads or fire trails may be absorbed as part of subsequent stages.  Note - The achievement of a cleared separation distance may not be achievable where other provisions within the planning scheme require protection of certain ecological, slope, visual or character features or functions.	
Where reconfiguration is undertaken in an urban area or is for urban purposes, a constructed perimeter road with reticulated water supply is established between the lots and the hazardous vegetation and is readily accessible at all times for urban fire fighting vehicles.	AO5.1  Lot boundaries are separated from hazardous vegetation by a public road which:  (a) has a two lane sealed carriageway; (b) contains a reticulated water supply; (c) is connected to other public roads at both ends	Not applicable  The development is not for reconfiguring a lot.
The access is available for both fire fighting and	and at intervals of no more than 500m;  (d) accommodates geometry and turning radii in accordance with Queensland Fire and	

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
maintenance/defensive works.	Emergency Services' Fire Hydrant and Vehicle Access Guidelines;	
	(e) has a minimum of 4.8m vertical clearance above the road;	
	(f) is designed to ensure hydrants and water access points are not located within parking bay allocations; and	
	(g) incorporates roll-over kerbing.	
	AO5.2	Not applicable
	Fire hydrants are designed and installed in accordance with AS2419.1 2005, unless otherwise specified by the relevant water entity.	The development is not for reconfiguring a lot.
	Note - Applicants should have regard to the relevant standards set out in the reconfiguration of a lot code and works codes in this planning scheme.	
PO6	AO6	Not applicable
Where reconfiguration is undertaken for smaller scale rural residential purposes, either a	Lot boundaries are separated from hazardous vegetation by a public road or fire trail which has:	The development is not for reconfiguring a lot.

Part 8 – Overlay Codes

Performance outcomes	Acceptable outcomes	Compliance
constructed perimeter road or a formed, all weather fire trail is established between the lots and the hazardous vegetation and is readily accessible at all times for the type of fire fighting vehicles servicing the area.	<ul> <li>(a) a reserve or easement width of at least 20m;</li> <li>(b) a minimum trafficable (cleared and formed) width of 4m capable of accommodating a 15 tonne vehicle and which is at least 6m clear of vegetation;</li> </ul>	
The access is available for both fire fighting and maintenance/hazard reduction works.	<ul> <li>(c) no cut or fill embankments or retaining walls adjacent to the 4m wide trafficable path;</li> <li>(d) a minimum of 4.8m vertical clearance;</li> <li>(e) turning areas for fire-fighting appliances in accordance with Queensland Fire and Emergency Services' Fire Hydrant and Vehicle Access Guidelines;</li> </ul>	
	<ul> <li>(f) a maximum gradient of 12.5%;</li> <li>(g) a cross fall of no greater than 10 degrees;</li> <li>(h) drainage and erosion control devices in accordance with the standards prescribed in a planning scheme policy;</li> <li>(i) vehicular access at each end which is connected to the public road network at</li> </ul>

	intervals of no more than 500m;  (j) designated fire trail signage;  (k) if used, has gates locked with a system authorised by Queensland Fire and Emergency Services; and  (l) if a fire trail, has an access easement that is granted in favour of Council and Queensland Fire and Emergency Services.	
P07	A07	Not applicable
Where reconfiguration is undertaken for other purposes, a formed, all weather fire trail is provided between the hazardous vegetation and either the lot boundary or building envelope, and is readily accessible at all times for the type of fire fighting vehicles servicing the area.	Lot boundaries are separated from hazardous vegetation by a public road or fire trail which has:  (a) a reserve or easement width of at least 20m;  (b) a minimum trafficable (cleared and formed) width of 4m capable of accommodating a 15 tonne vehicle and which is at least 6m clear of vegetation;	The development is not for reconfiguring a lot.
However, a fire trail will not be required where it would not serve a practical fire management purpose.	<ul><li>(c) no cut or fill embankments or retaining walls adjacent to the 4m wide trafficable path;</li><li>(d) a minimum of 4.8m vertical clearance;</li></ul>	

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	<ul> <li>(e) turning areas for fire-fighting appliances in accordance with Queensland Fire and Emergency Services' Fire Hydrant and Vehicle Access Guidelines;</li> </ul>	
	(f) a maximum gradient of 12.5%;	
	(g) a cross fall of no greater than 10 degrees;	
	<ul> <li>(h) drainage and erosion control devices in accordance with the standards prescribed in a planning scheme policy;</li> </ul>	
	<ul><li>(i) vehicular access at each end which is connected to the public road network;</li></ul>	
	(j) designated fire trail signage;	
	(k) if used, has gates locked with a system authorised by Queensland Fire and Emergency Services; and	
	<ul> <li>(I) if a fire trail, has an access easement that is granted in favour of Council and Queensland Fire and Emergency Services.</li> </ul>	
PO8	AO8	Not applicable

Performance outcomes	Acceptable outcomes	Compliance
The development design responds to the potential threat of bushfire and establishes clear evacuation routes which demonstrate an acceptable or tolerable risk to people.	The lot layout:  (a) minimises the length of the development perimeter exposed to, or adjoining hazardous vegetation;	The development is not for reconfiguring a lot.
	(b) avoids the creation of potential bottle-neck points in the movement network;	
	(c) establishes direct access to a safe assembly /evacuation area in the event of an approaching bushfire; and	
	(d) ensures roads likely to be used in the event of a fire are designed to minimise traffic congestion.	
	Note - For example, developments should avoid finger- like or hour-glass subdivision patterns or substantive vegetated corridors between lots.	
	In order to demonstrate compliance with the performance outcome, a bushfire management plan prepared by a suitably qualified person may be required. The bushfire management plan should be	
	developed in accordance with the Public Safety Business Agency (PSBA) guideline entitled	

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	"Undertaking a Bushfire Protection Plan.  Advice from the Queensland Fire and Emergency Services (QFES) should be sought as appropriate	
PO9	AO9	Not applicable
Critical infrastructure does not increase the potential bushfire hazard.	Critical or potentially hazardous infrastructure such as water supply, electricity, gas and telecommunications are placed underground.	The development is not for reconfiguring a lot.
Development design and separation from bushfire hazard – material change of use		
PO10	AO10	Not applicable
PO10  Development is located and designed to ensure proposed buildings or building envelopes achieve a radiant heat flux level at any point on the building or envelope respectively, of:  (e) 10kW/m² where involving a vulnerable use; or (f) 29kW/m² otherwise.  The radiant heat flux level is achieved by	Buildings or building envelopes are separated from hazardous vegetation by a distance that:  (a) achieves a radiant heat flux level of at any point on the building or envelope respectively, of 10kW/m² for a vulnerable use or 29kW/m² otherwise; and  (b) is contained wholly within the development site.	Not applicable  The development is not for a material change of use.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
are to be established in accordance with method 2 set out in AS3959-2009.	external to the site, certainty must be established (through tenure or other means) that the land will remain cleared of hazardous vegetation.  For staged developments, temporary separation distances, perimeter roads or fire trails may be absorbed as part of subsequent stages.  Note - The achievement of a cleared separation distance may not be achievable where other provisions within the planning scheme require protection of certain ecological, slope, visual or character features or functions.	
PO11	AO11	Not applicable
A formed, all weather fire trail is provided between the hazardous vegetation and the site boundary or building envelope, and is readily accessible at all times for the type of fire fighting vehicles servicing the area.  However, a fire trail will not be required where it would not serve a practical fire management purpose.	Development sites are separated from hazardous vegetation by a public road or fire trail which has:  (a) a reserve or easement width of at least 20m;  (b) a minimum trafficable (cleared and formed) width of 4m capable of accommodating a 15 tonne vehicle and which is at least 6m clear of vegetation;  (c) no cut or fill embankments or retaining walls	The development is not for a material change of use.

Performance outcomes	Acceptable outcomes	Compliance
Note - Fire trails are unlikely to be required where a development site involves less than 2.5ha	adjacent to the 4m wide trafficable path; (d) a minimum of 4.8m vertical clearance;	
	<ul> <li>(e) turning areas for fire-fighting appliances in accordance with Queensland Fire and Emergency Services' Fire Hydrant and Vehicle Access Guidelines;</li> </ul>	
	(f) a maximum gradient of 12.5%;	
	(g) a cross fall of no greater than 10 degrees;	
	<ul> <li>(h) drainage and erosion control devices in accordance with the standards prescribed in a planning scheme policy;</li> </ul>	
	<ul> <li>(i) vehicular access at each end which is connected to the public road network which is connected to the public road network at intervals of no more than 500m;</li> </ul>	
	(j) designated fire trail signage;	
	<ul><li>(k) if used, has gates locked with a system authorised by Queensland Fire and Emergency Services; and</li></ul>	

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	(I) if a fire trail, has an access easement that is granted in favour of Council and Queensland Fire and Emergency Services.	
All development		
PO12	AO12	Not applicable
All premises are provided with vehicular access that enables safe evacuation for occupants and easy access by fire fighting appliances.	Private driveways:  (a) do not exceed a length of 60m from the street to the building;  (b) do not exceed a gradient of 12.5%;  (c) have a minimum width of 3.5m;  (d) have a minimum of 4.8m vertical clearance;  (e) accommodate turning areas for fire-fighting appliances in accordance with Queensland Fire and Emergency Services' Fire Hydrant and Vehicle Access Guidelines; and  (f) serve no more than 3 dwellings or buildings.	The proposal is for a retaining wall only.
PO13	AO13	Not applicable

Performance outcomes	Acceptable outcomes	Compliance
Development outside reticulated water supply areas includes a dedicated static supply that is available solely for fire fighting purposes and can be accessed by fire fighting appliances.	A water tank is provided within 10m of each building (other than a class 10 building) which:  (a) is either below ground level or of non-flammable construction;	The proposed building would be a class 10 structure.
	(b) has a take off connection at a level that allows the following dedicated, static water supply to be left available for access by fire fighters:	
	(i) 10,000l for residential buildings	
	Note – A minimum of 7,500l is required in a tank and the extra 2,500l may be in the form of accessible swimming pools or dams.	
	(ii) 45,000l for industrial buildings; and	
	(iii) 20,000l for other buildings;	
	(c) includes shielding of tanks and pumps in accordance with the relevant standards;	
	(d) includes a hardstand area allowing medium rigid vehicle (15 tonne fire appliance) access within 6m of the tank;	
	(e) is provided with fire brigade tank fittings – 50mm ball valve and male camlock coupling	

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	and, if underground, an access hole of 200mm (minimum) to accommodate suction lines; and  (f) is clearly identified by directional signage provided at the street frontage.	
PO14	AO14	Not applicable
Landscaping does not increase the potential bushfire risk.	Landscaping uses species that are less likely to exacerbate a bushfire event and does not increase fuel loads within separation areas.	No landscaping is proposed.
PO15	AO15	Not applicable
The risk of bushfire and the need to mitigate that risk is balanced against other factors (such as but not limited to, biodiversity or scenic amenity).	Bushfire risk mitigation treatments do not have a significant impact on the natural environment or landscape character of the locality where this has value.	No bushfire risk mitigation treatments are required.

#### 8.2.5 Hillslopes overlay code

# 8.2.5.1 Application

- (1) This code applies to assessing a material change of use, reconfiguring a lot, operational work or building work within the Hillslopes overlay, if:
  - (a) self assessable or assessable development where the code is identified as being applicable in the Assessment criteria for the Overlay Codes contained in the Levels of Assessment Tables in section 5.6;
  - (b) impact assessable development.
- (2) Land in the Hillslopes overlay is identified on the Hillslopes overlay map in Schedule 2 and includes the following sub-categories:
  - (a) Hillslopes constraint sub-category.
- (3) When using this code, reference should be made to Part 5.

# 8.2.5.2 Purpose

- (1) The purpose of the Hillslopes overlay code is to:
  - (a) implement the policy direction in the Strategic Framework, in particular:
    - (i) Theme 1 Settlement pattern: Element 3.4.7 Mitigation of hazards;
    - (ii) Theme 2 Environment and landscape values: Element 3.5.5 Scenic amenity.
  - (b) enable an assessment of whether development is suitable on land within the Hillslopes sub-categories.
- (2) The purpose of the code will be achieved through the following overall outcomes:

- (a) development on hillslopes is safe, serviceable and accessible;
- (b) the ecological values, landscape character and visual quality of the hillslopes are protected from development so as to retain the scenic backdrop to the region;
- (c) Development on hillslopes is appropriate, having regard to the topographic constraints and environmental characteristics of the land;
- (d) Development responds to the constraints of the site including gradient and slope stability;
- (e) Works do not involve complex engineering solutions.

#### 8.2.5.3 Criteria for assessment

Table 8.2.5.3.a – Hillslopes overlay code –assessable development

Performance outcomes	Acceptable outcomes	Compliance
For self-assessable development		
P01	AO1.1	Complies with PO1
The landscape character and visual amenity quality of hillslopes areas is retained to protect the scenic backdrop to the region.	Development is located on parts of the site that are not within the Hillslopes constraint subcategory as shown on the Hillslopes overlay Maps contained in schedule 2.	The proposed retaining wall would be located below the existing dwelling house and would retain the scenic backdrop to the region.
For assessable development		
PO2	AO2.1	Complies with PO2

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
The landscape character and visual amenity quality of hillslopes areas is retained to protect the scenic backdrop to the region	Development does not occur on land with a gradient in excess of 1 in 6 (16.6%) or AO2.2 Where development on land steeper than 1 in 6 (16.6%) cannot be avoided, development follows the natural contours of the site.	The proposed retaining wall would be located below the existing dwelling house and would retain the scenic backdrop to the region.
	AO2.3	Not applicable
	Access ways and driveways are:  (a) constructed with surface materials that blend with the surrounding environment;  (b) landscaped with dense planting to minimise the visual impact of the construction;  (c) provided with erosion control measures immediately after construction.	The proposal is for a retaining wall only.
	AO2.4	Complies with AO2.4
	The clearing or disturbance of vegetation is limited to clearing and disturbance that:  (a) is necessary for the construction of driveways;	The construction of the retaining wall would not require the removal of any native vegetation.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	<ul><li>(b) is necessary to contain the proposed development;</li><li>(c) minimises canopy clearing or disturbance;</li><li>(d) minimises riparian clearing or disturbance.</li></ul>	
	AO2.5	Complies with PO2
	On land with slopes greater than 1 in 6 (16.6%) or greater, alternative construction methods to concrete slab on ground are utilised (i.e. split level or post and beam constructed buildings that minimise modification to the natural terrain of the land).	The proposed retaining wall would be located below the existing dwelling house and would retain the scenic backdrop to the region.
	AO2.6	Complies with AO2.6
	Development does not alter the sky line.	The proposed retaining wall would be located below the existing dwelling house and would not alter the sky line.
	AO2.7	Able to comply with AO2.7
	Buildings and structures:	The retaining wall would be finished to complement the existing house. Council are invited

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	<ul> <li>(a) are finished predominantly in the following exterior colours or surfaces:</li> <li>(i) moderately dark to darker shades of olive green, brown, green, blue, or</li> </ul>	to attach a condition to any approval granted to secure compliance if considered appropriate.
	charcoal; or  (ii) moderately dark to darker wood stains that blend with the colour and hues of the surrounding vegetation and landscape;	
	(b) are not finished in the following exterior colours or surfaces:	
	<ul> <li>(i) pastel or terracotta colours, reds, yellows, shades of white or beige, or other bright colours that do not blend with the surrounding vegetation and landscape;</li> <li>(ii) reflective surfaces.</li> </ul>	
	AO2.8	Able to comply with AO2.8
	Exterior colour schemes limit the use of white or	The retaining wall would be finished to

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	other light colours to exterior trim and highlighting of architectural features	complement the existing house. Council are invited to attach a condition to any approval granted to secure compliance if considered appropriate.
	AO2.9	Not applicable
	Areas between the first floor (including outdoor deck areas) and ground level are screened from view.	The application is for a retaining wall only.
	AO2.10	Not applicable
	Recreational or ornamental features (including tennis courts, ponds or swimming pools) do not occur on land:	No recreational facilities are proposed.
	(a) with a gradient of 1 in 6 (16.6%) or more;	
	(b) are designed to be sited and respond to the natural constraints of the land and require minimal earthworks.	
PO3	AO3	Complies with PO3
Excavation or filling does not have an adverse impact on the amenity, safety, stability or function	Excavation or fill:	The retaining wall would be located below the

Performance outcomes	Acceptable outcomes	Compliance
of the site or adjoining premises through:  (a) loss of privacy;  (b) loss of access to sunlight;  (c) intrusion of visual or overbearing impacts;  (d) complex engineering solutions.	<ul> <li>(a) is not more than 1.2 metres in height for each batter or retaining wall;</li> <li>(b) is setback a minimum of 2 metres from property boundaries;</li> <li>(c) is stepped with a minimum 2 metre wide berm to incorporate landscaping in accordance with Planning scheme policy SC6.7 – Landscaping;</li> <li>(d) does not exceed a maximum of 3 batters and 3 berms (i.e. not greater than 3.6 metres in height) on any one lot.</li> </ul>	<ul> <li>existing house and adjacent houses and would:</li> <li>not result in the loss of privacy;</li> <li>not result in the loss of access to sunlight;</li> <li>not result in visual or overbearing impacts; and,</li> <li>not require complex engineering solutions.</li> </ul>
Lot reconfiguration		
PO4	AO4.1	Not applicable
For development that involves reconfiguring a lot, lot layout and design is responsive to the natural constraints of the land and each lot is capable of being used for its intended purpose.	The frontage and depth of all lots is of sufficient width to:  (a) allow driveways to follow the natural contours of the site and not exceed a gradient of 1 in 6 (16.6%);	The proposal does not involve lot reconfiguration.

Performance outcomes	Acceptable outcomes	Compliance
	(b) accommodate any changes in gradient between the road and lot within the lot boundary and not within the road reserve.	
	AO4.2	Not applicable
	Development does not create new lots containing land of greater than 1 in 6 (16.6%), except where a rectangular area of land of lesser grade is contained within the new lots to accommodate the intended land use, with the balance left in its natural state to the greatest extent possible.  Note – The size of rectangular areas is outlined within each zone code.	The proposal does not involve lot reconfiguration.
	AO4.3	Not applicable
	Development does not alter ridgelines.	The proposal does not involve lot reconfiguration.
	AO4.4  Lots are designed to ensure rooflines of future buildings and structures do not protrude above a ridgeline.	Not applicable  The proposal does not involve lot reconfiguration.

#### 8.2.7 Natural areas overlay code

## 8.2.7.1 Application

- (1) This code applies to assessing a material change of use, reconfiguring a lot, operational work or building work within the Natural areas overlay, if:
  - (a) self-assessable or assessable development where the code is identified as being applicable in the Assessment criteria for the Overlay Codes contained in the Levels of Assessment Tables in section 5.6:
  - (b) impact assessable development.
- (2) Land in the Natural areas overlay is identified on the Natural areas overlay map in Schedule 2 and includes the following sub-categories:
  - (a) MSES Protected area;
  - (b) MSES Marine park;
  - (c) MSES Wildlife habitat;
  - (d) MSES Regulated vegetation;
  - (e) MSES Regulated vegetation (intersecting a Watercourse);
  - (f) MSES High ecological significance wetlands;
  - (g) MSES High ecological value waters (wetlands);
  - (h) MSES High ecological value waters (watercourse);
  - (i) MSES Legally secured off set area.

Note – MSES = Matters of State Environmental Significance.

(3) When using this code, reference should be made to Part 5.

# 8.2.7.2 Purpose

- (1) The purpose of the Natural areas overlay code is to:
  - (a) implement the policy direction in the Strategic Framework, in particular:
    - (i) Theme 2: Environment and landscape values, Element 3.5.3 Biodiversity, Element 3.5.4 Coastal zones;
    - (ii) Theme 3: Natural resource management Element 3.6.2 Land and catchment management, Element 3.6.3 Primary production, forestry and fisheries.
  - (b) enable an assessment of whether development is suitable on land within the Biodiversity area overlay sub-categories.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) development is avoided within:
    - (i) areas containing matters of state environmental significance (MSES);
    - (ii) other natural areas;
    - (iii) wetlands and wetland buffers;
    - (iv) waterways and waterway corridors.
  - (b) where development cannot be avoided, development:
    - (i) protects and enhances areas containing matters of state environmental significance;
    - (ii) provides appropriate buffers;
    - (iii) protects the known populations and supporting habitat of rare and threatened flora and fauna species, as listed in the relevant State and Commonwealth legislation;

- (iv) ensures that adverse direct or indirect impacts on areas of environmental significance are minimised through design, siting, operation, management and mitigation measures;
- (v) does not cause adverse impacts on the integrity and quality of water in upstream or downstream catchments, including the Great Barrier Reef World Heritage Area;
- (vi) protects and maintains ecological and hydrological functions of wetlands, waterways and waterway corridors;
- (vii) enhances connectivity across barriers for aquatic species and habitats;
- (viii) rehabilitates degraded areas to provide improved habitat condition, connectivity, function and extent;
- (ix) protects areas of environmental significance from weeds, pests and invasive species.
- (c) strategic rehabilitation is directed to areas on or off site, where it is possible to achieve expanded habitats and increased connectivity.

#### 8.2.7.3 Criteria for assessment

# Table 8.2.7.3.a - Natural areas overlay code -assessable development

Performance outcomes	Acceptable outcomes	Compliance
For self-assessable and assessable development		
Protection of matters of environmental significance		
PO1	AO1.1	Complies with AO1.1

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
Development protects matters of environmental significance.	Development avoids significant impact on the relevant environmental values.	The proposed retaining wall would be located in an existing cleared area.
	or	
	AO1.2	
	A report is prepared by an appropriately qualified person demonstrating to the satisfaction of the assessment manager, that the development site does not contain any matters of state and local environmental significance.	
	or	
	AO1.3	
	Development is located, designed and operated to mitigate significant impacts on environmental values. For example, a report certified by an appropriately qualified person demonstrating to the satisfaction of the assessment manager, how the proposed development mitigates impacts, including on water	

Performance outcomes	Acceptable outcomes	Compliance
	quality, hydrology and biological processes.	
Management of impacts on matters of environn	nental significance	
PO2	AO2	Complies with AO2
Development is located, designed and constructed to avoid significant impacts on matters of environmental significance.	<ul> <li>The design and layout of development minimises adverse impacts on ecologically important areas by:</li> <li>(a) focusing development in cleared areas to protect existing habitat;</li> <li>(b) utilising design to consolidate density and preserve existing habitat and native vegetation;</li> <li>(c) aligning new property boundaries to maintain ecologically important areas;</li> <li>(d) ensuring that alterations to natural landforms, hydrology and drainage patterns on the development site do not negatively affect ecologically important areas;</li> </ul>	The development would be within an existing disturbed and cleared area.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	(e) ensuring that significant fauna habitats are protected in their environmental context; and	
	(f) incorporating measures that allow for the safe movement of fauna through the site.	
PO3	AO3.1	Not applicable
An adequate buffer to areas of state environmental significance is provided and maintained.	A buffer for an area of state environmental significance (Wetland protection area) has a minimum width of:	The site is not within a wetland protection area.
	(a) 100 metres where the area is located outside Urban areas; or	
	(b) 50 metres where the area is located within Urban areas.	
	or	
	AO3.2	
	A buffer for an area of state environmental significance is applied and maintained, the width of	

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	which is supported by an evaluation of environmental values, including the function and threats to matters of environmental significance.	
PO4	AO4.1	Not applicable
Wetland and wetland buffer areas are maintained, protected and restored.	Native vegetation within wetlands and wetland buffer areas is retained.	The site does not contain a wetland buffer area.
Note – Wetland buffer areas are identified in AO3.1.	AO4.2	Not applicable
	Degraded sections of wetlands and wetland buffer areas are revegetated with endemic native plants in patterns and densities, which emulate the relevant regional ecosystem.	The site does not contain a wetland buffer area.
PO5	AO5.1	Complies with AO5.1
Development avoids the introduction of non- native pest species (plant or animal) that pose a	Development avoids the introduction of non-native pest species.	It is not proposed to introduce pest species.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
risk to ecological integrity.	AO5.2  The threat of existing pest species is controlled by adopting pest management practices for long-term ecological integrity.	Not applicable  There are no known pest species on the site.
Ecological connectivity		
PO6	AO6.1	Not applicable
Development protects and enhances ecological connectivity and/or habitat extent.	Development retains native vegetation in areas large enough to maintain ecological values, functions and processes.  and	The site is not within an identified wildlife habitat area.
	AO6.2	
	Development within an ecological corridor rehabilitates native vegetation.  and	

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	AO6.3  Development within a conservation corridor mitigates adverse impacts on native fauna, feeding, nesting, breeding and roosting sites and native fauna movements.	
Po7 Development minimises disturbance to matters of state environmental significance (including existing ecological corridors).	AO7.1  Development avoids shading of vegetation by setting back buildings by a distance equivalent to the height of the native vegetation.  and  AO7.2  Development does not encroach within 10 metres of existing riparian vegetation and watercourses.	Complies with AO7.1 and AO7.2  The development would not cause any shading of native vegetation and is not adjacent a riparian corridor.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
PO8	AO8.1	Not applicable
Development is set back from waterways to protect and maintain:  (a) water quality;  (b) hydrological functions;  (c) ecological processes;  (d) biodiversity values;  (e) riparian and in-stream habitat values and connectivity;  (f) in-stream migration.	Where a waterway is contained within an easement or a reserve required for that purpose, development does not occur within the easement or reserve; or  AO8.2  Development does not occur on the part of the site affected by the waterway corridor.  Note – Waterway corridors are identified within 8.	The site does not contain any waterways.
Waterways in a non-urban area		
PO9  Development is set back from waterways to	AO9  Development does not occur on that part of the site	Not applicable  The site does not contain any waterways.

Performance outcomes	Acceptable outcomes	Compliance
protect and maintain:	affected by a waterway corridor.	
(a) water quality;	Note – Waterway corridors are identified within table	
(b) hydrological functions;	8.2.7.3.b.	
(c) ecological processes;		
(d) biodiversity values;		
(e) riparian and in-stream habitat values and connectivity;		
(f) in-stream migration.		

#### 8.2.9 Potential landslide hazard overlay code

#### 8.2.9.1 Application

- (1) This code applies to assessing a material change of use, reconfiguring a lot, operational work or building work within the Potential landslide hazard overlay; if
  - (a) self-assessable or assessable development where the code is identified as being applicable in the Assessment criteria for the Overlay Codes contained in the Levels of Assessment Tables in section 5.6;
  - (b) impact assessable development.
- (2) Land in the Potential landslip hazard overlay is identified on the Potential landslide hazard overlay maps in Schedule 2 and includes the following subcategories:
  - (a) Places of potential landslide hazard sub-category.
- (3) When using this code, reference should be made to Part 5.

Note – The Potential landslide hazard overlay shows modelled areas where the factors contributing to landslip potential accumulate to provide a moderate or higher risk if certain factors are exacerbated (e.g. factors include significant vegetation clearing, filling and excavation, changes to soil characteristics, changes to overland water flow, or changes to sub-surface water flow). It shows areas that the Council has identified where landslides may occur and where land may be impacted by a landslide but does not mean that landslides will occur or that the land will be impacted by a landslide. Other areas not contained within the potential landslide hazard overlay may sustain landslides or be impacted by landslides and consideration should be given to this issue, where appropriate.

# 8.2.9.2 Purpose

- (1) The purpose of the Potential landslide hazard overlay code is:
  - (a) implement the policy direction of the Strategic Framework, in particular:
    - (i) Theme 1: Settlement pattern Element 3.4.7 Mitigation of hazards.
  - (b) enable an assessment of whether development is suitable on land within the Potential landslip hazard overlay.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) development is located, designed and constructed to not put at risk the safety of people, property and the environment;
  - (b) development is not at risk from and does not pose a risk to adjacent and nearby sites from landslides;
  - (c) ensures that community infrastructure is protected from the effects of potential landslides;
  - (d) ensures that vegetation clearing, stormwater management and filling and/or excavation does not create a landslide hazard and/or rectifies potential pre-existing landslide risks;
  - (e) development does not occur where works to provide a solution for safety of people, property or the environment involves complex engineering solutions to overcome the risk, or would result in a built form or outcome that causes an adverse visual impact on the Hillslopes or Landscape values of Douglas Shire.

# 8.2.9.3 Criteria for assessment

Table 8.2.9.3.a- Potential landslide hazard overlay code -assessable development

Performance outcomes	Acceptable outcomes	Compliance
For self-assessable and assessable developme	nt	
PO1	AO1.1	Complies with AO1.1
The siting and design of development does not involve complex engineering solutions and does not create or increase the potential landslide hazard risk to the site or adjoining premises through:  (a) building design;  (b) increased slope;  (c) removal of vegetation;  (d) stability of soil;  (e) earthworks;  (f) alteration of existing ground water or surface water paths;  (g) waste disposal areas.	Development is located on that part of the site not affected by the Potential landslide hazard overlay. or  AO1.2  Development is on an existing stable, benched site and requires no further earthworks or  AO1.3  A competent person certifies that:  (a) the stability of the site, including associated buildings and infrastructure, will be maintained during the course of the development and will remain stable for the life of the development;	The proposed retaining wall would be located on part of the site not affected by the overlay.

Performance outcomes	Acceptable outcomes	Compliance
	(b) development of the site will not increase the risk of landslide hazard activity on other land, including land above the site;	
	(c) the site is not subject to the risk of landslide activity on other land;	
	(d) any measures identified in a site-specific geotechnical report for stabilising the site or development have been fully implemented;	
	(e) development does not concentrate existing ground water and surface water paths;	
	(f) development does not incorporate on-site waste water disposal.	
	Note – Planning scheme policy SC6.9 – Natural hazards provides guidance on preparing a site specific geo-technical assessment.	
	Note – Development may alter the conditions of ground water and surface water paths in accordance with a site-specific geotechnical report, but should ensure that its final disbursement is as-per pre-developed	

Performance outcomes	Acceptable outcomes	Compliance
	conditions. Consideration for location, velocity, volume and quality should be given.	
PO2	AO2	Complies with PO2
The siting and design of necessary retaining structures does not cause an adverse visual impact on landscape character or scenic amenity quality of the area.	<ul> <li>Excavation or fill:</li> <li>(a) is not more than 1.2 metres in height for each batter or retaining wall;</li> <li>(b) is setback a minimum of 2 metres from property boundaries;</li> <li>(c) is stepped with a minimum 2 metre wide berm to incorporate landscaping in accordance with Planning scheme policy SC6.7 – Landscaping;</li> <li>(d) does not exceed a maximum of 3 batters and 3 berms (i.e. Not greater than 3.6 metres in height) on any one lot.</li> </ul>	The proposed retaining wall would be located on below the existing dwelling house. It would retain the scenic backdrop to the region and landscape character of the area.
Additional requirements for Community infrastructure		
PO3 Development for community infrastructure:	AO3	Not applicable

Perfo	ormance outcomes	Acceptable outcomes	Compliance
(b)	is not at risk from the potential landslide hazard areas; will function without impediment from a landslide; provides access to the infrastructure without impediment from the effects of a landslide; does not contribute to an elevated risk of a landslide to adjoining properties.	Development is designed in accordance with the recommendations of a site-specific geotechnical assessment which makes reference to the community infrastructure and its needs and function.  Note - A site specific geotechnical assessment will detail requirements that will address the Acceptable Outcomes of this Performance Outcome. Planning scheme policy SC6.9 – Natural hazards provides guidance on preparing a site specific geotechnical assessment.	The development is not for community infrastructure.

#### 9.4.4 Filling and excavation code

#### 9.4.4.1 Application

- (1) This code applies to assessing:
  - (a) operational work for filling or excavation which is self-assessable or code assessable development if this code is an applicable code identified in the assessment criteria column of a table of assessment; or
  - (b) a material change of use or reconfiguring a lot if:
    - (i) assessable development where this code is identified as a prescribed secondary code in the assessment criteria column of a table of assessment; or
    - (ii) impact assessable development, to the extent relevant.

Note—This code does not apply to building work that is regulated under the Building Code of Australia.

(2) When using this code, reference should be made to Part 5.

# 9.4.4.2 Purpose

- (1) The purpose of the Filling and excavation code is to assess the suitability of development for filling or excavation.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) filling or excavation does not impact on the character or amenity of the site and surrounding areas;
  - (b) filling and excavation does not adversely impact on the environment;
  - (c) filling and excavation does not impact on water quality or drainage of upstream, downstream or adjoining properties;
  - (d) filling and excavation is designed to be fit for purpose and does not create land stability issues;

(e) filling and excavation works do not involve complex engineering solutions.

#### 9.4.4.3 Criteria for assessment

Table 9.4.4.3.a – Filling and excavation code – for self-assessable and assessable development

Performance outcomes	Acceptable outcomes	Compliance		
For self-assessable and assessable developme	For self-assessable and assessable development			
Filling and excavation - General				
PO1	AO1.1	Complies with PO1.		
All filling and excavation work does not create a detrimental impact on the slope stability, erosion potential or visual amenity of the site or the surrounding area.	The height of cut and/or fill, whether retained or not, does not exceed 2 metres in height.  and  Cuts in excess of those stated in A1.1 above are separated by benches/ terraces with a minimum width of 1.2 metres that incorporate drainage provisions and screen planting.	The proposed outbuilding would be located below the existing dwelling house and would retain the scenic backdrop to the region. In addition, excavation and fill would be retained by an engineer designed retaining wall and would not:  • not impact on slope stability;  • not increase erosion potential; or  • result in visual or overbearing impacts.		

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance
	AO1.2  Cuts are supported by batters, retaining or rock walls and associated benches/terraces are capable of supporting mature vegetation.	Complies with AO1.2  The proposed retaining wall is engineer designed.
	AO1.3  Cuts are screened from view by the siting of the building/structure, wherever possible.	Not Applicable  No exposed cuts are proposed.
	AO1.4  Topsoil from the site is retained from cuttings and reused on benches/terraces.	Complies with AO1.4  The proposal is for the reuse of the topsoil from previous development on the site.
	AO1.5  No crest of any cut or toe of any fill, or any part of any retaining wall or structure is closer than 600mm to any boundary of the property, unless the prior written approval of the adjoining	Complies with AO1.5  No earthworks would be undertaken within 600mm of any boundary.

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance		
	landowner has been obtained.			
	AO1.6	Not applicable		
	Non-retained cut and/or fill on slopes are stabilised and protected against scour and erosion by suitable measures, such as grassing, landscaping or other protective/aesthetic measures.	No non-retained earthworks are proposed.		
Visual Impact and Site Stability				
PO2	AO2.1	Complies with AO2.1		
Filling and excavation are carried out in such a manner that the visual/scenic amenity of the area and the privacy and stability of adjoining properties is not compromised.	The extent of filling and excavation does not exceed 40% of the site area, or 500m² whichever is the lesser, except that AO2.1 does not apply to reconfiguration of 5 lots or more.	The earthworks is minor and less than 40% of the site.		
	AO2.2	Complies with AO2.2		
	Filling and excavation does not occur within 2	No excavation or fill would be undertaken within 2		

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance		
	metres of the site boundary.	metres of any boundary.		
Flooding and drainage				
PO3	AO3.1	Complies with AO3.1		
Filling and excavation does not result in a change to the run off characteristics of a site which then have a detrimental impact on the site or nearby land or adjacent road reserves.	Filling and excavation does not result in the ponding of water on a site or adjacent land or road reserves.	The retaining wall has been engineer designed with consideration of drainage management.		
	AO3.2	Complies with AO3.2		
	Filling and excavation does not result in an increase in the flow of water across a site or any other land or road reserves.	The retaining wall has been engineer designed with consideration of drainage management		
	AO3.3	Complies with AO3.3		
	Filling and excavation does not result in an increase in the volume of water or concentration of water in a watercourse and overland flow paths.	The retaining wall has been engineer designed with consideration of drainage management		

20203094 – 8 Anchor Court, Killaloe (Retaining Wall)

Performance outcomes	Acceptable outcomes	Compliance		
	AO3.4	Complies with AO3.4		
	Filling and excavation complies with the specifications set out in Planning Scheme Policy No SC5 – FNQROC Development Manual.	The retaining wall has been engineer designed and would be undertaken in accordance with the requirements of the FNQROC Manual.		
Water quality				
PO4	AO4	Complies with AO4		
Filling and excavation does not result in a reduction of the water quality of receiving waters.	Water quality is maintained to comply with the specifications set out in Planning Scheme Policy No SC5 – FNQROC Development Manual.	The retaining wall has been engineer designed with consideration of drainage management		
Infrastructure				
PO5	AO5	Complies with AO35		
Excavation and filling does not impact on Public Utilities.	Excavation and filling is clear of the zone of influence of public utilities.	Earthworks would not occur near any public utilities.
