DEVELOPMENT APPLICATION FOR BUILDING WORK ASSESSABLE AGAINST THE PLANNING SCHEME (CODE ASSESSABLE) FOR NEW CARPORT & CARAVAN SHELTER LOCATED AT 4069 CAPTAIN COOK HIGHWAY, WANGETTI - LOT12 NR7187

THE PREMISES

Application is being made for the construction of a carport structure associated with existing flats / units that exist on the site in addition to a caravan shelter. The property is located at 4069 Captain Cook Highway, Wangetti being Lot 12 CPNR7187.

The site is contained within the Environmental Management zone in which building work is identified as code assessable development.

The site was the former Hartley's Creek Zoo and Crocodile Farm and as such there are a number of buildings and structures existing on the premises. The existing main residence is an expansive dwelling with large garage to the south. In addition to the existing dwelling there are two class 1a habitable 1 bedroom buildings on the premises. The existence of these flats are recognised on the Rates Notice.

The proposal is to provide covered car parking for these flats in the form of a double carport. In addition it is proposed to construct a Class 10 structure to provide shelter for a Caravan. The carport is located approximately 7.5m from the southern boundary and the Caravan shelter is located approximately 17.5m from the northern boundary.

A Site Plan is provided that shows the location of the 2 bay Carport and the proposed shelter. Please refer to the attached plans.

Images of the improvements are also provided below.

Douglas Shire Planning Scheme

Under the Planning Scheme, a Development Application is required to be made for the building work due to the site being contained within the Environmental Management zone. It is noted that building work in the Environmental Management zone is code assessable development.

The following is a summary of the Planning Scheme elements that affect the land:

Zone - the proposed development is located on a premises within the Environmental Management Zone.

Local Plan - the proposed development is not located on a premises within a Local Plan area.

Level of assessment - The level of assessment specified in Part 5 – Tables of Assessment for undertaking building work in the Environmental Management Zone is **Code Assessment**.

Overlays - The premises are identified within the extents of the following overlays:

Acid Sulfate Soils	Acid Sulfate Soils (5-20m AHD) Acid Sulfate Soils (< 5m AHD)
Bushfire	Potential Impact Buffer
Coastal Environment	Coastal Management District Erosion Prone Area
Flood and Storm Tide Hazard	Medium Storm Tide Hazard Floodplain Assessment Overlay
Hillslopes	Area affected by Hillslopes
Landscape Values	Scenic route buffer High landscape values
Natural Areas	MSES - Regulated Vegetation MSES - Wildlife Habitat
Transport Network	Transport Noise Corridor Road Hierarchy - Arterial Road and Major Transport Corridor Buffer Area (State Controlled Road) Pedestrian and Cycle Network - Iconic Recreation Route

Assessment benchmarks – The assessment benchmarks (identified in the applicable elements above and in Part 5 - Tables of Assessment) contained in the following codes are relevant to the assessment of the proposed development:

Environmental Management Zone Code

Acid Sulfate Soils Overlay Code

Bushfire Overlay Code

Coastal Environment Overlay Code

Flood and Storm Tide Hazard Overlay Code

Hillslopes Overlay Code

Natural Areas Overlay Code

Dwelling House Code

Access, Parking and Servicing Code

Infrastructure works Code

Vegetation Management Code

*It is noted that the premises are identified within the extents of the Transport Noise Corridors and the Transport Network Overlay Code, the Overlay Code is not identified as an applicable code for consideration in the assessment of the proposed development identified in the Tables of Assessment for the Environmental Management Zone.

Planning Assessment

While the site is contained within the Environmental Management zone, the site is developed and continues to be used for residential purposes.

While the land is affected by a number of overlays, a review of the overlays and the corresponding mapping reveals that the location of the structures do not conflict with the purpose or development outcomes sought by the overlay codes.

The siting of the structures is taking place on the flat and useable sections of the site. The structures do not result in vegetation being removed. Minor excavations will be required to construct the concrete slab and footings associated with the structures.

A Property Assessment Report has been prepared and is attached. The report illustrates the various overlay mapping that affects the site. In most instances, it appears that the mapping is quite course and does not accurately reflect the features of the site.
