GENERAL

All construction is to comply with C2 building standards, Building Code of Australia, all relevant legislation, and Council By-Laws.
Builders are to ensure that all materials nominated on this plan are used and fixed strictly in accordance with the manufacturers specifications, also taking into consideration all site conditions applicable to the materials allowable and recommended use. Substitution of any structural members, or variation to any part of the design without seeking approval prior to changing will void any responsibility of the Designer and Engineer for the structural integrity and performance of the building. Only Australian Standards compliant steel members are to be used in this building
All nominated fixings, reinforcing, timber sizes and grades etc are the minimum requirements.
All dimensions must to be checked by the Builder prior to commencing any work - written dimensions take precedence over scaled.
Any alterations or discrepancies are to be clarified with the plan Author or Engineer prior to carrying out the work.
This plan has been prepared for building approval only and is not intended to be read as a complete specification of the work and finishes to be carried out on this project.

TERMITE PROTECTION

This structure as detailed complies with the provisions of AS3660.1 for the protection of new buildings from subterranean termites.
Owners are reminded that to maintain compliance with AS3660.1 they are advised to have inspections carried out by a qualified person every 12 months generally, and every 3 months if in an area where termite risk is high.
