Dear Daniel

Please find response to information request.

1. Site Plan of revegetated areas
Revegetation areas are marked on site plan previously submitted
2. Description of testing process
Bio Prospecting will involves the collection of small samples of different parts of different test(planted)plants at different stages of growth and at different times of the year which are sent to our lab on gold coast for analysis.
3. Chemical information
Only small qualities of household chemical will be used and stored on site of use in the house

Thank you
Regards
Justine Murray
