This form **must** be used to make a development application **involving building work**.

For a development application involving **building work only**, use this form (DA Form 2) only. The DA Forms Guide provides advice about how to complete this form.

For a development application involving **building work associated and any other type of assessable development** (i.e. material change of use, operational work or reconfiguring a lot), use *DA Form 1 – Development application details* and parts 4 to 6 of this form (DA Form 2).

Unless stated otherwise, all parts of this form **must** be completed in full and all required supporting information **must** accompany the development application.

One or more additional pages may be attached as a schedule to this development application if there is insufficient space on the form to include all the necessary information.

This form and any other form relevant to the development application must be used to make a development application relating to strategic port land and Brisbane core port land under the *Transport Infrastructure Act 1994*, and airport land under the *Airport Assets (Restructuring and Disposal) Act 2008*. For the purpose of assessing a development application relating to strategic port land and Brisbane core port land, any reference to a planning scheme is taken to mean a land use plan for the strategic port land, Brisbane port land use plan for Brisbane core port land, or a land use plan for airport land.

Note: All terms used in this form have the meaning given under the Planning Act 2016, the Planning Regulation 2017, or the Development Assessment Rules (DA Rules).

6.2.4 Environmental management zone code

6.2.4.1 Criteria for assessment

Table 6.2.4.3.a – Environmental management zone – assessable development

Performance outcomes	Acceptable outcomes	Applicant response
For self-assessable and assessable development		
PO1 The height of all buildings and structures is in keeping with the natural characteristics of the site. Buildings and structures are low-rise and not unduly visible from external sites.	AO1.1 Buildings and structures are not more than 8.5 metres and two storeys in height. Note – Height is inclusive of the roof height. AO1.2 Buildings have a roof height not less than 2 metres.	Complies with AO1.1 The proposed dwelling is single storey and has a maximum height of approximately 5.2m Complies with AO1.2 Proposed roof height is approximately 2.38m
PO2 Buildings and structures are set back to: (a) Maintain the natural character of the area; (b) Achieve separation from neighbouring buildings and from road frontages.	AO2 Buildings and structures are set back not less than: (a) 40 metres from the frontage of a state controlled road; (b) 25 metres from the frontage to Cape Tribulation Road; (c) 6 metres from any other road; (d) 6 metres from the side and rear boundaries of the site.	Does not comply with AO2 Complies with PO2 The proposed building setbacks are: <ul style="list-style-type: none"> • 10.0m from the Tati Road boundary • 10.775m from the northern side boundary • 5.083m from the eastern side boundary/Miallo Bamboo Creek Road boundary The proposed reduced setback to the Miallo Bamboo Creek road boundary is a corner of the building only. The boundary adjoins a cane train line and the road verge is approximately 25m wide in the location of the proposed encroachment. Accordingly, the proposed reduced setback will not have any detrimental impacts on the road users.

Performance outcomes	Acceptable outcomes	Applicant response
		The proposed setbacks are considered to maintain the character of the area and the proposed dwelling location is adequately separated from existing buildings and road frontages as above.
For assessable development		
PO3 Development is consistent with the purpose of the Environmental management zone and protects the zone from the intrusion of inconsistent uses	AO3 Inconsistent uses as identified in Table 6.2.4.3.b are not established in the Environmental management zone.	Complies with AO3 The proposal is for a dwelling house only
PO4 The site coverage of all buildings and structures and associated services do not have an adverse effect on the environmental or scenic values of the site.	PO4 No acceptable outcomes are prescribed.	Complies with PO4 The proposed site coverage is 8.72% which is considered to be in accordance with the intent of the zone code and is consistent with existing development within the locality.
PO5 Development is located, designed, operated and managed to respond to the characteristics, features and constraints of the site and its surrounds. Note - Planning scheme policy – Site assessments provides guidance on identifying the characteristics, features and constraints of a site and its surrounds.	AO5.1 Buildings, structures and associated access, infrastructure and private open space are sited: <ul style="list-style-type: none"> (a) within areas of the site which are already cleared; or (b) within areas of the site which are environmentally degraded; (c) to minimise additional vegetation clearing. AO5.2 Buildings and structures and associated infrastructure are not located on slopes greater than 1 in 6 (16.6%) or on a ridgeline.	Complies with AO5.1 The allotment is fully cleared and no vegetation damage is required to facilitate the construction of the proposed dwelling. Complies with AO5.2 The allotment has less than 1.0m of fall over the entire width and length.
PO6 Buildings and structures are responsive to steep slope through innovative construction techniques	AO6.1 Where development on land steeper than 1 in 6 (16.6%) cannot be avoided, development follows	Not Applicable

Performance outcomes	Acceptable outcomes	Applicant response
so as to: (a) maintain the geotechnical stability of slopes; (b) minimise cut and/or fill; minimise the overall height of development.	the natural contours of the land and single plane concrete slab on-ground methods of construction are not utilised. AO6.2 Access and vehicle manoeuvring and parking areas are constructed and maintained to: (a) minimise erosion; (b) minimise cut and fill; (c) follow the natural contours of the site.	Able to comply with AO6.2
PO7 The exterior finishes of buildings and structures are consistent with the surrounding natural environment.	AO7 The exterior finishes and colours of buildings and structures are non-reflective and are moderately dark to darker shades of grey, green, blue and brown or the development is not visible external to the site.	Able to comply with AO7
PO8 Development does not adversely affect the amenity of the zone and adjoining land uses in terms of traffic, noise, dust, odour, lighting or other physical or environmental impacts.	AO8 No acceptable outcomes are prescribed.	Complies with PO8 It is considered that the construction of the proposed dwelling house will not affect the amenity of the adjoining land users. The proposed development is small scale and measures will be taken to control dust, noise etc as required
PO9 The density of development ensures that the environmental and scenic amenity values of the site and surrounding area are not adversely affected.	AO9 The maximum residential density is one dwelling house per lot.	Complies with AO9 The proposal is for one dwelling house on a single lot
PO10 Lot reconfiguration results in no additional lots. Note - Boundary realignments to resolve encroachments and lot amalgamation are considered appropriate.	AO10 No acceptable outcomes are prescribed.	Not Applicable

8.2.1 Acid sulfate soils overlay code

8.2.1.1 Criteria for assessment

Table 8.2.1.3.a – Acid sulfate soils overlay code – assessable development

Performance outcomes	Acceptable outcomes	Applicant response
For self-assessable and assessable development		
PO1 The extent and location of potential or actual acid sulfate soils is accurately identified.	AO1.1 No excavation or filling occurs on the site. or AO1.2 An acid sulfate soils investigation is undertaken. Note - Planning scheme policy SC 6.12– Potential and actual acid sulfate soils provides guidance on preparing an acid sulfate soils investigation.	Does not comply with AO1.1 It is proposed to import fill to a depth of approximately 300 mm in order to raise the pad level due to flooding concerns. The fill will be locally sourced and will not contain any acid sulfate soils.
PO2 Development avoids disturbing potential acid sulfate soils or actual acid sulfate soils, or is managed to avoid or minimise the release of acid and metal contaminants.	AO2.1 The disturbance of potential acid sulfate soils or actual acid sulfate soils is avoided by: (a) not excavating, or otherwise removing, soil or sediment identified as containing potential or actual acid sulfate soils; (b) not permanently or temporarily extracting groundwater that results in the aeration of previously saturated acid sulfate soils; (c) not undertaking filling that results in: (d) actual acid sulfate soils being moved below the water table; (e) previously saturated acid sulfate soils being aerated. For self-assessable and assessable development		
<p>PO1 Development is located and designed to: ensure the safety of all persons; minimise damage to the development and contents of buildings; provide suitable amenity; minimise disruption to residents, recovery time, and rebuilding or restoration costs after inundation events.</p> <p>Note – For assessable development within the flood plain assessment sub-category, a flood study by a suitably qualified professional is required to identify compliance with the intent of the acceptable outcome.</p>	<p>AO1.1 Development is sited on parts of the land that is not within the Flood and Storm tide hazards overlay maps contained in Schedule 2;</p> <p>or</p> <p>For dwelling houses,</p> <p>AO1.2 Development within the Flood and Storm Tide hazards overlay maps (excluding the Flood plain assessment sub-category) is designed to provide immunity to the Defined Inundation Event as outlined within Table 8.2.4.3.b plus a freeboard of 300mm.</p> <p>AO1.3 New buildings are: (a) not located within the overlay area; (b) located on the highest part of the site to minimise entrance of flood waters; (c) provided with clear and direct pedestrian and vehicle evacuation routes off the site.</p> <p>AO1.4 In non urban areas, buildings and infrastructure are set back 50 metres from natural riparian corridors</p>	<p>Complies with AO1.2</p> <p>300 mm of fill is proposed to be provided creating a pad level of 10.70m AHD. The floor slab is 250 mm above the pad level providing proposed finished slab level of 10.95m AHD which is approximately 600 mm above the current ground level to provide the desired level of immunity.</p> <p>Condition 3c of the reconfiguration of a lot approval (DSC reference ROL 1967/2017) required the floor level of the future dwellings to be nominated. The drawings submitted with the Operational Works application indicate the future floor level for habitable rooms as being 10.3m AHD which council has accepted. The proposed floor level is 650 mm higher than that nominated which will ensure the dwelling is provided with flood immunity.</p>

	<p>AO3.6 Signage is provided on site (regardless of whether the land is in public or private ownership) indicating the position and path of all safe evacuation routes off the site and if the site contains, or is within 100m of a floodable waterway, hazard warning signage and depth indicators are also provided at key hazard points, such as at floodway crossings or entrances to low-lying reserves.</p> <p>or</p> <p>AO3.7 There is no intensification of residential uses within the flood affected areas on land situated below the DFE/Storm tide.</p>

<p>PO5 Development directly, indirectly and cumulatively avoids any increase in water flow velocity or flood level and does not increase the potential flood damage either on site or on other properties.</p> <p>Note – Berms and mounds are considered to be an undesirable built form outcome and are not supported.</p>	<p>For Operational works AO5.1 Works in urban areas associated with the proposed development do not involve: (a) any physical alteration to a watercourse or floodway including vegetation clearing; or (b) a net increase in filling (including berms and mounds).</p> <p>AO5.2 Works (including buildings and earthworks) in non urban areas either: (a) do not involve a net increase in filling greater than 50m³; or (b) do not result in any reductions of on-site flood storage capacity and contain within the subject site any changes to depth/duration/velocity of flood waters; or (c) do not change flood characteristics</p>	<p>Not Applicable</p>
