Tree Health and Condition Recommendation

After inspection of large Raintree over the restaurant at 5/31 Macrossan St, Port Douglas, we recommend removal due to tree impacting structures. Along with this, root systems are impacting both plumbing and storm water drains. Tree canopy is situated right above the restaurant and there have been several large limbs fail recently. Therefore, this tree is a liability to the public and patrons of the restaurant. As the tree and its canopy continues to spread, it will become a higher risk and have more potential for limb failure. I have completed an inspection of this tree and found no evidence of native wildlife or any threatened species of animals.

Thank you

Corrie Kelly | FNQ Operations Manager | MPDT Pty Ltd

Watergate Restaurant Port Douglas Raintree Removal

Douglas Shire Planning Scheme – Vegetation Management Code

The Raintree is a tall, impressive tree which provides shade and food resources for wildlife. However long-term ramifications of damages caused by the tree to the building outweigh the benefits of the tree. Removal of the tree is likely to be the only reasonable solution to the problem.

In the future the tree would likely cause ongoing damage to surrounding building infrastructure if left in place.

Performance outcomes	Assessment
The character & amenity Of the local area will be Maintained	* On going growth of the tree will continue to cause major maintenance to the structure of the building both above and below ground with possibility of injury to customers and staff Of the restaurant.

Vegetation damage will Not result in fragmentation Of habitats	The removal of the Raintree will not impact local wildlife as the adjoining Council Park has a large centre Mango tree and Gardens which wildlife already inhabit. This is an extremely Large shade tree.
---	---

Vegetation damage will be Undertaken in a sustainable Manner	*The Raintree is not connected to natural habitats *The Raintree will be completely removed.
---	---

Performance/Acceptable Outcomes of P02 and 03 will be met:

*P02 – Vegetation damaged on the lot does not result in a nuisance.

- The tree will be removed and disposed of at an approved site (A02.1).

*P03 – Vegetation damage identified on the Places of significance overlay lot does not result in a negative impact on the site's heritage values.

Impact Mitigation

The tree should be removed as soon as possible to take advantage of the quiet season in the Douglas Shire and to avoid any further accidents from falling branches. In this way disruptions to pedestrians, vehicle traffic and surrounded businesses will be less impacted.
