Subject:

Objection to proposed development MCUI-2024_5698

To Whom it may concern,

[REDACTED] would like to formally object to the above proposal on the grounds that,

- 1.The local people have not had sufficient time to gather thoughts on the above proposal and object if required.
- 2.The area is on a flood plain?
- 3.There are no emergency services in the village. ie police , ambulance , hospital. These are all located 30 minutes from the Daintree Village and police are only on call at night with the police station unmanned.
4. Is the proposed transport barge in survey and licensed to carry personal?

During the 2024 flood event , we where cutoff from emergency services for 9 days , only access to the village was via helicopter , the Telstra tower was not working and the only communication was via starlink that we installed in the October of that year. Due to no power we where on generated power and short of food and fuel during that time. Once Ergon was able to get through it was still a couple days till power was restored.

I feel that this proposal has not been tabled properly for the local people and next to no thought has gone into it given the above.

I wish my privacy to be respected in accordance with the Planning Act 2016.
