 - (a) Areas for use for primary production are conserved and fragmentation is avoided.
 - (b) Development embraces sustainable land management practices and contributes to the amenity and landscape of the area.
 - (c) Adverse impacts of land use, both on-site and on adjoining areas, are avoided and any unavoidable impacts are minimised through location, design, operation and management.
 - (d) Areas of remnant and riparian vegetation are retained or rehabilitated.

Criteria for assessment**Table 6.2.10.3.a – Rural zone code assessable development**

Performance outcomes	Acceptable outcomes	Applicant response
For self-assessable and assessable development		
PO1 The height of buildings is compatible with the rural character of the area and must not detrimentally impact on visual landscape amenity.	AO1.1 Dwelling houses are not more than 8.5 metres in height. Note – Height is inclusive of roof height. AO1.2 Rural farm sheds and other rural structures are not more than 10 metres in height.	No new building works in the proposed realignment Existing farm sheds are 3m in height
Setbacks		
PO2 Buildings and structures are setback to maintain the rural character of the area and achieve separation from buildings on adjoining properties.	AO2 Buildings are setback not less than: (a) 40 metres from the property boundary and a State-controlled road; (b) 25 metres from the property boundary adjoining Cape Tribulation Road; (c) 20 metres from the boundary with any other road; (d) 6 metres from side and rear property boundaries.	No new building works in the proposed realignment
PO3 Buildings/structures are designed to maintain the rural character of the area.	AO3 White and shining metallic finishes are avoided on external surfaces of buildings.	No new building works in the proposed realignment
For assessable development		
PO4 The establishment of uses is consistent with the outcomes sought for the Rural zone and protects the zone from the intrusion of inconsistent uses.	AO4 Uses identified in Table 6.2.10.3.b are not established in the Rural zone.	No proposed changes to existing grazing pastures

Performance outcomes	Acceptable outcomes	Applicant response
P05 Uses and other development include those that: (a) promote rural activities such as agriculture, rural enterprises and small scale industries that serve rural activities; or (b) promote low impact tourist activities based on the appreciation of the rural character, landscape and rural activities; or (c) are compatible with rural activities.	A05 No acceptable outcomes are prescribed.	No proposed changes to existing grazing pastures N/A Compatible with rural activities
P06 Existing native vegetation along watercourses and in, or adjacent to areas of environmental value, or areas of remnant vegetation of value is protected.	A06 No acceptable outcomes are prescribed.	No requirements to clear or damage existing vegetation. As advised by SARA all new boundaries are set back at least 10metres from category B vegetation under the vegetation management act 1999.
P07 The minimum lot size is 40 hectares, unless (a) the lot reconfiguration results in no additional lots (e.g. amalgamation, boundary realignments to resolve encroachments); or (b) the reconfiguration is limited to one additional lot to accommodate: (i) Telecommunications facility; (ii) Utility installation.	A07 No acceptable outcomes are prescribed.	No additional lots required. 2 lots into 2 lots. Proposed boundary realignment only N/A

Table 6.2.10.3.b - Inconsistent uses within the Rural zone.

Inconsistent uses		
• Adult store • Bar • Brothel • Car wash • Child care centre • Club • Community care centre • Community residence • Detention facility, • Dual occupancy • Dwelling unit • Food and drink outlet • Hardware and trade supplies • Health care services • High impact industry	• Hotel • Indoor sport and recreation • Low impact industry • Medium impact industry • Multiple dwelling • Nightclub entertainment facility • Non-resident workforce accommodation • Office • Outdoor sales • Parking station • Permanent plantation • Port services • Relocatable home park • Renewable energy facility, being a wind farm	• Residential care facility • Resort complex • Retirement facility • Rooming accommodation • Sales office • Service station • Shop • Shopping centre • Short-term accommodation • Showroom • Special industry • Theatre • Warehouse

Note – This table does not imply that all other uses not listed in the table are automatically consistent uses within the zone. Assessable development must still demonstrate consistency through the assessment process.

9.4.7 Reconfiguring a lot code

9.4.7.1 Application

- (1) This code applies to assessing reconfiguring a lot if:
 - (a) assessable development where the code is an applicable code identified in the assessment criteria column of a table of assessment;
 - (b) impact assessable development, to the extent relevant.
- (2) When using this code, reference should be made to Part 5.

9.4.7.2 Purpose

- (1) The purpose of the Reconfiguring a lot code is to regulate development for reconfiguring a lot.
- (2) The purpose of the code will be achieved through the following overall outcomes:
 - (a) development results in a well-designed pattern of streets supporting walkable communities;
 - (b) lots have sufficient areas, dimensions and shapes to be suitable for their intended use taking into account environmental features and site constraints;
 - (c) road networks provide connectivity that is integrated with adjoining existing or planned development while also catering for the safe and efficient access for pedestrians, cyclists and for public transport;
 - (d) lots are arranged to front all streets and parkland such that development enhances personal safety, traffic safety, property safety and security; and contributes to streetscape and open space quality;

- (e) development does not diminish environmental and scenic values, and where relevant, maintains and enhances public access and use of natural areas, rivers, dams, creeks and the foreshore, in a way that protects natural resources;
- (f) people and property are not placed at risk from natural hazards;
- (g) a range of functional parkland, including local and district parks, major areas of parkland with a region-wide focus and open space links are available for the use and enjoyment of residents and visitors to the region;
- (h) the appropriate standard of infrastructure is provided.

9.4.7.3 Criteria for assessment

Table 9.4.7.3.a. – Reconfiguring a lot code – assessable development

Performance outcomes	Acceptable outcomes	Applicant response
General lot design standards		
PO1 Lots comply with the lot reconfiguration outcomes of the applicable Zone code in Part 5.	AO1 No acceptable outcomes prescribed	Complies – the proposed development relates to the realignment of a common boundary between two lots. The proposed development does not significantly or unreasonably alter the resultant lot sizes
PO2 New lots are generally rectangular in shape with functional areas for land uses intended by the zone.	AO2 Boundary angles are not less than 45 degrees.	All boundary angles are greater than 45 degrees with exception of one angle which is unavoidable with shape of paddock
PO3 Lots have legal and practical access to a public road.	AO3 Each lot is provided with: (a) direct access to a gazetted road reserve; or (b) access to a gazetted road via a formal access arrangement registered on the title.	Complies – each lot continues to be serviced under existing arrangements.

Performance outcomes	Acceptable outcomes	Applicant response
PO4 Development responds appropriately to its local context, natural systems and site features.	AO4 Existing site features such as: (a) significant vegetation and trees; (b) waterways and drainage paths; (c) vistas and vantage points are retained and/or are incorporated into open space, road reserves, near to lot boundaries or as common property.	Complies – the proposed development does not impact on significant vegetation and trees, waterways and drainage paths or vistas.
PO5 New lots which have the capability of being further reconfigured into smaller lots at a later date are designed to not compromise ultimate development outcomes permitted in the relevant zone.	AO5 The ability to further reconfigure land at a later date is demonstrated by submitting a concept plan that meets the planning scheme requirements for the applicable Zone.	Not applicable
PO6 Where existing buildings or structures are to be retained, development results in: (a) boundaries that offer regular lot shapes and usable spaces; (b) existing improvements complying with current building and amenity standards in relation to boundary setbacks. Note - This may require buildings or structures to be modified, relocated or demolished to meet setback standards, resolve encroachments and the like.	AO6 Development ensures setbacks between existing buildings or structures and proposed boundaries satisfy relevant building standards or zone code requirements, whichever is the greater.	Existing paddock sheds meet setback standards
PO7 – PO19	AO7-AO19	Not Applicable

The boundary realignment proposal involves no changes to the current layout, infrastructure, access and environment.
