Subject: Planning Application MCUI 2026_5936/1

Dear Chief Executive office.

I would like to formally support the application for the use of lot 32 on SP332240 - 6868 Captain Cook Highway,
Killaloe QLD 4877. Solar farm and storage battery

I think a solar farm and storage battery is an excellent use of land in that area. The area already has a prawn farm, airfield, nursery

and set back from the road the council tip. A solar farm in my opinion fits well with that mix of use and farmers should be encouraged to

Seek dual harvest possibilities and additional cash flow from solar farms as well as traditional harvest like sugar cane.

A solar farm if approved will bring construction employment to the region and ongoing maintenance, cleaning and security jobs for the

Life of the farm.

The closure of the sugar mill means that any diversified investment like a solar farm should be encouraged and the solar farm will

also signal Douglas Shire commitment to renewable energy and that reduction connection of emissions in a very small way to protecting the great barrier reef.

Yours Sincerely,
