Submission:- Re MCUI_20255809/1

To whom it may concern.

We sincerely believe that Council and the Community in general, have an absolute responsibility to do everything in their power to protect or rehabilitate the natural environment. Here is a golden opportunity to do just that by supporting this proposed development, especially in such a flood prone catchment area of the Daintree River.

My wife, myself and my wider family all support the approval of this environmentally important back to Nature development, and even suggest that anybody opposing this application cannot be living in the real world!

Science tells us that this kind of action is completely vital to help mitigate the huge effects of the ever worsening extreme weather events with great cost to the local councils.
