YOUR REF: OP 1999/2017 (810919)

OUR REF: 1794/L03

13 April 2017

Attention: Planning Department

Douglas Shire Council PO Box 723 Mossman QLD 4873

Dear Sir/Madam

RE: Information Request for Operation Works Application - Port Douglas Reservoir - Crees Road Craiglie

With reference to your letter dated 7th April 2017, Douglas Shire Council – Infrastructure Department provides the following responses to the queries.

ID	Query	Response
1	RPEQ signed drawings and IDAS forms to be provided	IDAS forms are attached.
	10 00 00 00 00 00 00 00 00 00 00 00 00 0	Signed RPEQ drawings will be provided in due
		course. These will not differ conceptually from
		the previously provided drawings and we
		request assessment not be delayed due to this
		minor administrative oversight
2	FNQROC Statement of Compliance	Statement will be provided in due course. Access to the western portion of Lot 144 on
3	Confirm how practical access to existing paddocks is being provided.	SP113652 is maintained at the current location
	existing paddocks is being provided.	albeit the intersection is to be reconfigured from
		a road alignment to a driveway/road alignment
		at Ch 0 on Drawing CR001.
		In addition a rural access in accordance with
		FNQROC standard drawing will also be
}		provided to the eastern portion of the Lot.
		The implication of the query is that access along
		the full road corridor is necessary. We would
		dispute the validity of this claim and note that
		the road has been in existence since 1892. It is
		the owners (or leasee) responsibility to
		undertake farming activities, including access
<u> </u>		within their property boundaries.
4	Future upgrades impact of water main	There are no plans to upgrade Ferrero or Crees Roads at this point in time. Although the
	location	proposed planning scheme foreshadows
		potential future development through its
		proposed Residential Investigation Area
		designation, the purpose of this Investigation

		Area is to thoroughly examine the constraints, infrastructure servicing and capacity requirements, flooding and drainage, future road hierarchy and sequencing needs prior to any development occurring.
****		It is not likely that Ferrero Road will be the main entry road into the Residential Investigation Area given its proximity to the roundabout on the Captain Cook Highway. Furthermore, the Residential Investigation Area does not extend to the western side of Crees Creek and therefore Crees Road is unlikely to be affected in the longer term.
		Accordingly, there is no need to adjust the design (depth, cover and alignment) of the water main.
5	Road to FNQROC standard	The extension of the new road to the reservoir will terminate at the reservoir. The volume of traffic utilising the new section of road will be extremely low as it leads to no particular destination (i.e. it will terminate at a gate to the reservoir). The FNQROC design standards cater for a desirable speed environment of 100km/hr, which is an improbability given the length of new road proposed.
		Furthermore, the reduced formation and width of seal assists in minimising the depth/gradient of drains required along the new section of road seal.
		The proposed road design is therefore considered to be fit for purpose in this instance.
7	Stormwater engineering calculations Scour potential of drain	Drawings will be provided in due course. We would note that the area of concern, from approximately Ch 474 is not road but rather private property, albeit still Council's. Hence whilst the comment is noted and relevant, it should not be a constraint on the application.
		We would recommend a soft engineering solution such as reinforced turf within the property. Rock inverts will be problematic for slashing crews.
8	Table drained required at Ch300 to Ch460	The comment is noted. The plans provide for a drainage solution. However, Council has the option of conditioning the requirement for a sheet flow solution if it considers this to be a more desirable outcome.

Should you have any queries, please do not hesitate to contact the undersigned.

Yours faithfully

Scott Hahne

Project Engineer Douglas Shire Council

IDAS form 1—Application details

(Sustainable Planning Act 2009 version 4.3 effective 5 December 2016)

This form must be used for ALL development applications.

You **MUST** complete **ALL** questions that are stated to be a mandatory requirement unless otherwise identified on this form.

For all development applications, you must:

- complete this form (IDAS form 1—Application details)
- · complete any other forms relevant to your application
- provide any mandatory supporting information identified on the forms as being required to accompany your application.

Attach extra pages if there is insufficient space on this form.

All terms used on this form have the meaning given in the Sustainable Planning Act 2009 (SPA) or the Sustainable Planning Regulation 2009.

This form and any other IDAS form relevant to your application must be used for development applications relating to strategic port land and Brisbane core port land under the *Transport Infrastructure Act 1994* and airport land under the *Airport Assets (Restructuring and Disposal) Act 2008.* Whenever a planning scheme is mentioned, take it to mean land use plan for the strategic port land, Brisbane core port land or airport land.

PLEASE NOTE: This form is not required to accompany requests for compliance assessment.

Mandatory requirements

Applicant details (Note: the applicant is the person responsible for making the application and need not be the owner of the land. The applicant is responsible for ensuring the information provided on all IDAS application forms is correct. Any development permit or preliminary approval that may be issued as a consequence of this application will be issued to the applicant.)

By making this application, I declare that all information in this application is true and correct (Note: it is unlawful to provide false or misleading information)

Notes for completing this form

Section 261 of the Sustainable Planning Act 2009 prescribes when an application is a properly-made application.
Note, the assessment manager has discretion to accept an application as properly made despite any non-compliance with the requirement to provide mandatory supporting information under section 260(1)(c) of the Sustainable Planning Act 2009

Applicant details

• Where the applicant is not a natural person, ensure the applicant entity is a real legal entity.

Question 1

Schedule 3 of the Sustainable Planning Regulation 2009 identifies assessable development and the type of
assessment. Where schedule 3 identifies assessable development as "various aspects of development" the
applicant must identify each aspect of the development on Tables A, B and C respectively and as required.

Question 6

• Section 263 of the Sustainable Planning Act 2009 sets out when the consent of the owner of the land is required for an application. Section 260(1)(e) of the Sustainable Planning Act 2009 provides that if the owner's consent is required under section 263, then an application must contain, or be accompanied by, the written consent of the owner, or include a declaration by the applicant that the owner has given written consent to the making of the application. If a development application relates to a state resource, the application is not required to be supported by evidence of an allocation or entitlement to a state resource. However, where the state is the owner of the subject land, the written consent of the state, as landowner, may be required. Allocation or entitlement to the state resource is a separate process and will need to be obtained before development commences.

Question 7

If the premises is listed on either the Contaminated Land Register (CLR) or the Environmental
Management Register (EMR) under the Environmental Protection Act 1994 it may be necessary to
seek compliance assessment. Schedule 18 of the Sustainable Planning Regulation 2009 identifies
where compliance assessment is required.

Question 10

- The Building and Construction Industry (Portable Long Service Leave) Act 1991 prescribes when the portable long service leave levy is payable.
- The portable long service leave levy amount and other prescribed percentages and rates for calculating the levy are prescribed in the Building and Construction Industry (Portable Long Service Leave) Regulation 2013.

Question 10a

- The portable long service leave levy need not be paid when the application is made, but the Building and
 Construction Industry (Portable Long Service Leave) Act 1991 requires the levy to be paid before a development
 permit is issued.
- Building and construction industry notification and payment forms can be completed on the QLeave website at www.qleave.qld.gov.au. For further information contact QLeave on 1800 803 481.

Privacy—The information collected in this form will be used by the Department of Infrastructure, Local Government and Planning (DILGP), assessment manager, referral agency and/or building certifier in accordance with the processing and assessment of your application. Your personal details should not be disclosed for a purpose outside of the IDAS process or the provisions about public access to planning and development information in the *Sustainable Planning Act 2009*, except where required by legislation (including the *Right to Information Act 2009*) or as required by Parliament. This information may be stored in relevant databases. The information collected will be retained as required by the *Public Records Act 2002*.

IDAS form 6—Building or operational work assessable against a planning scheme

(Sustainable Planning Act 2009 version 3.1 effective 3 August 2015)

This form must be used for development applications for building work or operational work assessable against a planning scheme.

You MUST complete ALL questions that are stated to be a mandatory requirement unless otherwise identified on this form

For all development applications, you must:

- complete IDAS form 1—Application details
- complete any other forms relevant to your application
- provide any mandatory supporting information identified on the forms as being required to accompany your application.

Attach extra pages if there is insufficient space on this form.

All terms used on this form have the meaning given in the Sustainable Planning Act 2009 (SPA) or the Sustainable Planning Regulation 2009.

This form must be used for building work or operational work relating on strategic port land and Brisbane core port land under the *Transport Infrastructure Act 1994* and airport land under the *Airport Assets (Restructuring and Disposal) Act 2008* that requires assessment against the land use plan for that land. Whenever a planning scheme is mentioned, take it to mean land use plan for the strategic port land, Brisbane core port land or airport land.
